Terminal Blocks

Terminal blocks are components and systems the main function of which is to ensure safe and secure electrical and mechanical conductor connections. The term covers all conceivable types, designs and forms of connection. From the application point of view, the most important group of terminals is that of rail mounted modular terminal blocks.

- The current carrying bar must be made of metals which reduce electrical losses to minimum.
- Insulation material must be nonflammable and self extinguishing.
- The screw must not be loosened due to vibration.
- The current carrying bar must have such a form that the conductor has a strong contact area in the connection point.

The terminal block series should have a complete range together with all the accessories to provide the best solutions in an ideal area.

Connection Systems

SCREW CONNECTION

This is the most popular of all known methods of connection. Screw connection refers to any connection in which the conductor is stripped of its insulation and clamped without any special preparation. Klemsan screw clamp system is built in protection against loosening.

When the screw is tightened, the resultant pressure pulls apart both halves of the clamping yoke. This generates a particularly high locking action on the screw. These clamping systems provide excellent vibration resistance.

SPRING CLAMP SYSTEM

The stainless steel spring presses the conductor directly against the current bar. Due to the special construction of the clamping body, the contact force is further increased when pulling the conductor.

PRACTICAL SPRING CLAMP SYSTEM

In addition to spring clamp system, with practical technology, there is no need to use a screwdriver, cable is connected to the terminal by just pushing in.

Materials

KLEMSAN terminals are made of selected standard materials. Insulating materials, clamping and conducting metals are subjected to strict quality control as required by stringent international standards.

Clamping yokes and screws are zinc plated which considerably increases the resistance to corrosion. Current bars are made out of brass / electrolytic copper. Coating of tin / lead oxide, nickel while ensuring surface protection guarantees very low contact resistance.

Engineering thermoplastic Polyamide 6.6 has excellent electrical, mechanical and chemical characteristics even at temperatures as high as 100 °C and contain no cadmium based color pigments. Polyamide 6.6 moulded housing absorbs humidity from its surroundings. This makes the plastic material elastic and fracture proof even at temperatures as low as -40 °C. Being a self extinguishing material it is difficult to ignite and burns only as long as there is a longlasting supporting flame. It is rated V0 or V2 according to UL94. Good aging resistance and insensitivity to ultraviolet light makes it suitable for tropical and open air applications.

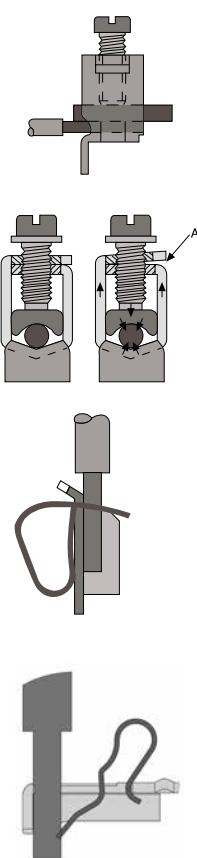

Main Terminology

Modular Terminal Blocks: Modular terminal blocks are used worldwide. Whether they be in distribution boards, control centers or machine control systems, in ships, power stations or railway rolling stock, Klemsan terminals guarantee safe connections in all low voltage installations. In view of this versatile and worldwide application, the materials used and the technical data achieved meet the highest quality standard. Approvals have been obtained from all major industrial countries.

Rated Cross-Sec.: The rated Cross-Sec. of a terminal block is a value of conductor Cross-Sec. which is indicated by the manufacturer and covered by the thermal, mechanical and electrical requirements.

Rated Current: The rated current of a terminal block is a current value which is indicated by the manufacturer and covered the thermal, mechanical and electrical requirements on using the rated Cross-Sec..

The Rated Voltage: The rated voltage of a terminal block is a voltage value which is stated by the manufacturer according to creepage and clearance distances and which does not allow any deformation on product.

Nominal Dimensions: Nominal dimensions are the overall dimensions of the terminal block with fixings, but without tolerances. To the specified terminal with a tolerance of +0.2 mm. must be allowed during design when mounting in rows.

Insulation Stripping Length: The required stripping length for every Klemsan product is stated in mm. These lengths must be observed.

End Plate: The last terminal in a rail mounted assembly must be closed with an end plate. The end plate is held in position by the end bracket.

Partition: The partition is required for the visual separation of circuits or for electrical separation in case of adjacent cross connections.

Small Partition: Small partitions can be inserted after assembly into terminal blocks of up to a Max. thickness of 10 mm. between cross connections and test sockets.

Conductors

Aluminum and copper conductors are used for the connection of terminals, but copper conductors are used more frequently. These conductors are divided into two main categories.

1- Rigid conductors

- a- Solid strand
- b- Knitted conductors

2- Fine Strand

Conductor cross sections are distinguished as metric and American standards.

Metric mm ²	American AWG / kcmil	Equivalent Cross-Sec. al area mm ²
0,2	24	0,205
0,34	22	0,324
0,5	20	0,519
0,75	18	0,82
1	-	-
1,5	16	1,3
2,5	14	2,1
4	12	3,3
6	10	5,3
10	8	8,4
16	6	13,3
25	4	21,2
35	2	33,6
50	0	53,5
70	00	67,4
95	000	85
-	0000	107,2
120	250 kcmil	127
150	300 kcmil	152
185	350 kcmil	177
240	500 kcmil	253
300	600 kcmil	304

AWG : (American Wire Gauge) American standard of measure

1 kcmil : 1000 cmils

1 cmil : (1 circular mil) the area of a circle with a Width of one mil

1 mil : 1/1000 inch

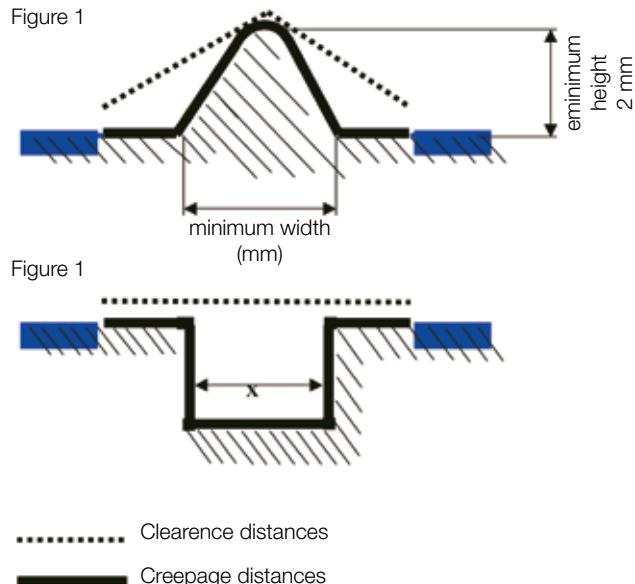

Clearance and Creepage Distances

If the corresponding clearance distance is less than 3 mm, the smallest groove width may be reduced to 1/3 of this clearance distance.

The measuring methods of clearance and creepage distances are revealed in IEC 60947-1 EK G. Projections decrease the creepages with a high level. Therefore, the clearance which has a projection higher than 2mm can be decreased with 80 percent. (FIGURE 1).

Klemsan terminals has pollution degree 3 according to IEC 60947-1 standart. "Conductive pollution or dry, non-conductive pollution occurs liable to be rendered conductive through anticipated moisture condensation."

Degree of Soiling	Minimum Width "x" in mm
1	0,25
2	1,0
3	1,5
4	2,5

Pollution Severities

Pollution Severity is a classification of environmental conditions under which a terminal block operates.

It is not the atmosphere in a terminal block which determines the isolation performance, but it is creepage distance and micro environment of clearance distance which do this. Microenvironment can be better or worse compared to the atmosphere operated in.

There are 4 identified degrees of microenvironment pollution in evaluating creepage and clearance distances.

Pollution Severity 1:

No pollution or only dry and non-conductive pollution

Pollution Severity 2:

Only non-conductive pollution at a normal level. Besides there may be short-time pollution due to the condensation occurring occasionally

Pollution Severity 3:

Either conductive or dry and non-conductive pollution occurring due to the condensation

Pollution Severity 4:

Permanent pollution occurring due to conductive dust, rain or snow.

Isolation Material Groups

Material groups are classified in line with the creepage distance indices (CTI) as shown below:

Material group I $600 \leq CTI$

Material group II $400 \leq CTI < 600$

Material group IIIa $175 \leq CTI < 400$

Material group IIIb $100 \leq CTI < 175$

Specified CTI values directly affect the creepage distances. Below are the distances as regards to some voltage values

Distances are in mm.	Pollution Severity 3			
	Material Group			
Rated Voltage Value (V)	I	II	IIIA	IIIB
400	5	5,6	6,3	6,3
500	6,3	7,1	8	8
630	8	9	10	10

Protection Types

PE CONDUCTOR: The conductor with Earthing protection only. Mounting rails may be used as protective conductor busbars, provided that the values specified in below table for thermal short-time withstand current and thermal rated current are not exceeded.

Rail Profile	Material	Equivalent E.Cu Cross-Sec. (mm ²)	Short time withstand current (A)	Thermal rated current of a PEN busbar (A)
MR 15 x 5,5	Steel	10	1,2	-
	Copper	25	3	101
	Aluminum	16	1,92	76
G - Type Rail / MR 32	Steel	35	4,2	-
	Copper	120	14,4	269
	Aluminum	70	8,4	192
MR 35 x 7,5	Steel	16	1,92	-
	Copper	50	6	150
	Aluminum	30	4,2	125
MR 35 x 15	Steel	50	6	-
	Copper	150	18	309
	Aluminum	95	11,4	232

Pen Conductor : The conductor that functions as both protection and neutral conductor. Steel busbar or Steel Rails cannot be used as PEN conductor.

Torque Values of Fastening

In screw type terminals torque values are important. If the connector is tightened less than the required value, resistance and heating would appear. On the contrary, when extreme force is applied during fastening, the molecular structure of the metal would distort and heating could appear in conclusion. Therefore, if the nominal torque values obtained by IEC are applied, the probable risks would be eliminated.

Torque values based on IEC 60947-1 Table 4;		Torque (Nm)		
Screw Width Values (mm)		I	II	III
Screws with Widths smaller than 1.6 mm	0,005	0,1	0,1	0,1
1,6 - 2	0,1	0,2	0,2	0,2
2 - 2,8	0,2	0,4	0,4	0,4
2,8 - 3	0,25	0,5	0,5	0,5
3 - 3,2	0,3	0,6	0,6	0,6
3,2 - 3,6	0,4	0,8	0,8	0,8
3,6 - 4,1	0,7	1,2	1,2	1,2
4,1 - 4,7	0,8	1,8	1,8	1,8
4,4 - 5,3	1,2	2	2	2
5,3 - 6	2,5	2,5	3	3
6 - 8	-	3,5	6	6
8 - 10	-	4	10	10
10 - 12	-	-	-	14
12 - 15	-	-	-	19
15 - 20	-	-	-	25
20 - 24	-	-	-	36
Screws with Widths bigger than 24 mm	-	-	-	50

COLUMN I Applied to the headless screws fixing in the cavity and other screws which cannot fastened by screw-drivers.

COLUMN II Applied to all screws fastened by screw-drivers.

COLUMN III Applied to screws and nuts fastened by other devices.

Ref: IEC 60947-1 / IEC 60999-1

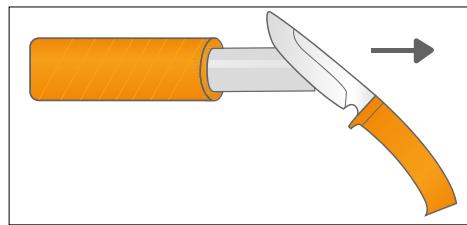

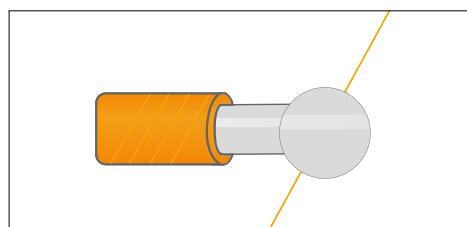

Klemsan apply security tests to its screw-type terminals with doubled values of IEC torque standards.

Precautions For Aluminium Cable Usage In Klemsan Terminal Blocks

- Precautions against oxidation should be taken while using aluminium cables.
- There are several special products against oxidation, however the most practical and easy solution is using vaseline.
- Application of vaseline on the stripped parts of the aluminium cables that contacting the terminal block, will prevent oxidation.

Otherwise, the bare cable ends contacts the air and will start a rapid oxidation in the terminal block. Voltage values will drop consequently

- If cutting the oxidized cable end is not needed, the oxide layer can be cleaned manually with a knife carefully to not affect the cable cross-section.
- Vaseline is applied to the surfaces after the cleaning process.

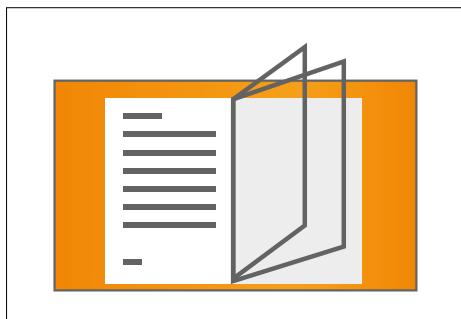

- Aluminium cables are not flexible as copper cables, therefore they are mostly in solid and stranded form.
- While using aluminium cables, especially the stranded types, conductive materials should be carefully watched against breaking and cracking.

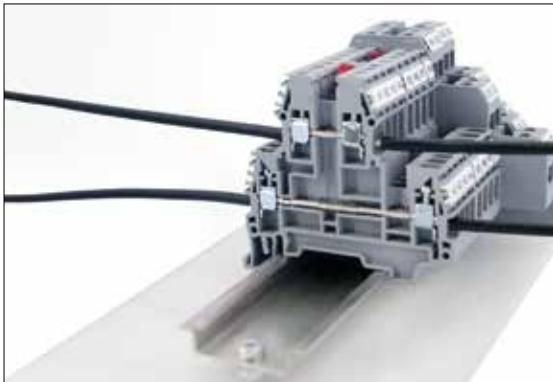

Otherwise, the cross-section of the cable will decrease and terminal temperatures will increase as a result

Conductivity rates of aluminium cables are lower than copper cables.

- Rated current values indicated in the terminal block data sheets should **not** be considered while using aluminium cables.

While using aluminium cables, the current rate indicated for copper cables should be multiplied by 0.7, the result will give the maximum current value which should not be exceeded unless otherwise indicated.

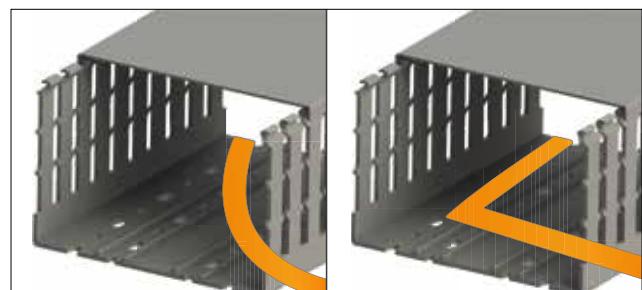

- Maximum torque values indicated in the technical specifications should not be exceeded while using aluminium cables.
- Users should check the tightening process every other day according to the torque values indicated in terminal block data sheets and make sure that the screws are correctly tightened in the given maximum torque value.
- Aluminium cables get softer in time and this cause the connection loose. Connections should be checked regularly as indicated above
- Stripping lengths indicated in the terminal block data sheets are quite important especially for aluminium cable connections.
- Aluminium cables without insulation can easily become oxidized.

- Narrow curves or corners should be avoided while using aluminium cables within panels and wiring ducts, wiring ducts corners should be as wide as possible.

Otherwise, risks of cable breaking, bending or cracking possibilities will increase.

↑
CORRECT ANGLE

↑
WRONG ANGLE

- It is recommended to use Al/Cu type insulated cable terminals with stranded aluminium cables.

Terminal Suffix Descriptions

Suffix	Explanations
A	Disconnect (Knife Edge)
AN	Angled
ASK B	Busbar (Glass Fuse Size) Disconnection
AVK B	Busbar Power Terminals
AVK PB	Panel Surface Mounting Terminals
C&CC	2 Input 2 Outputs
CPB	Fork Type Terminals
CS	Cross Connection (for StoP and SRD series)
CTP	Clamp to Pin
D	Diode
D	Direct-Feed through (for WGO types)
E&CE	1 Input 2 Outputs
F	Floor
FB	Socket type busbar disconnection
K	Inner Bridge
LD	LED+Diode
M	Mini
MB	Hinge type busbar disconnection
N	New
NM	New Material, *V0 flammability rating*

AVK Series Terminals

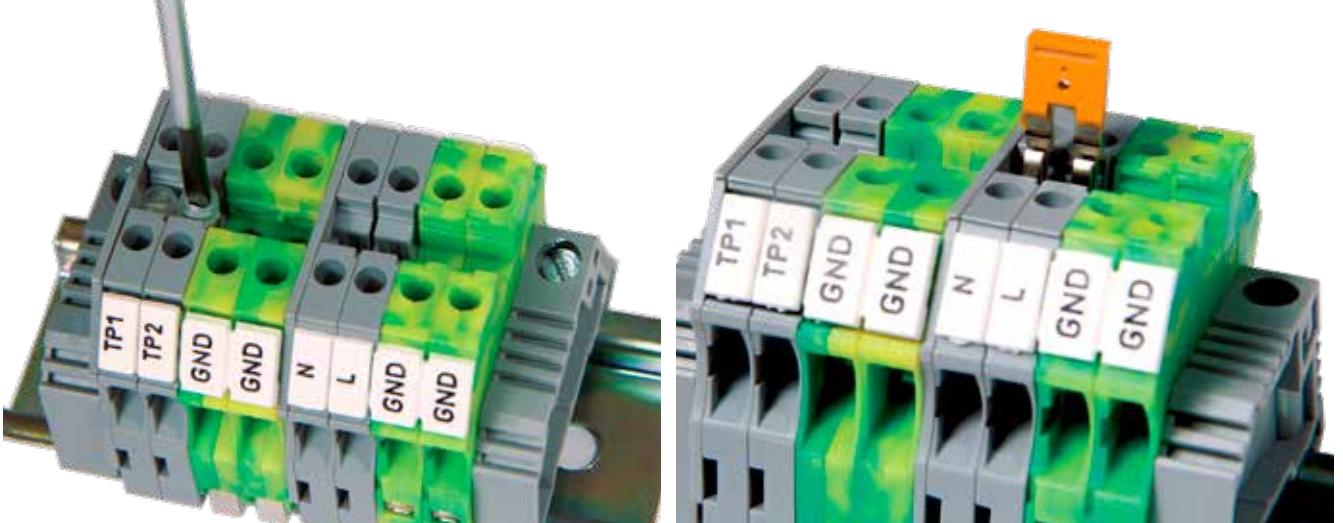

AVK Series Screw Connection Rail Terminals provide the whole range of cross sections from 2,5 up to 240 mm². Terminals accessories like Cross Connection, End Plate, Comb Connector are available. Special Marking solutions for each cross section can be provided by Plotter labeling. The color of products can be selected from the color table.

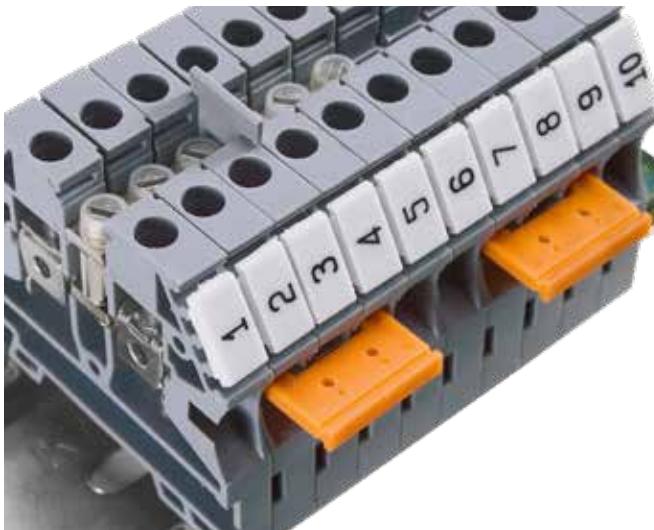

You can safely connect solid and stranded cables with ferrules and also you can use stranded cables without ferrule.

AVK RD series earth terminal blocks provide easy and screwless installation on the rail.

Thanks to push-in type jumpers, AVK RD series 2.5 and 4 mm² cross section feed-through terminal blocks can be cross connected easier and faster way. AVK 2.5 R and AVK 4 R terminals blocks are suitable for double line push-in cross connection, also suitable for strip label.

AVK 2.5 - 4,0 - 6,0 - 10,0 mm² range has the same height and lenght so that, one type of end plate and partition plate can be used.

You can also use comb type cross connection with AVK series terminal blocks in 2.5 - 4 - 6 - 10 mm² cross sections. All AVK series terminal blocks have special marking solutions for your projects.

FEATURE OF AVK EARTH TERMINAL BLOCKS

Screw type earth terminal blocks can meet all important IEC requirements, such as low contact resistance, corrosion-resistant of connection points, secure screws etc. between 2.5 mm² - 50 mm² cross section options.

Yellow-green (mixed commando) body color is easily distinguishable from other terminal blocks. They do not cause visual problems when they are mounted side by side on the rail, because they are equal in size with the feed-through terminal block in the same cross section.

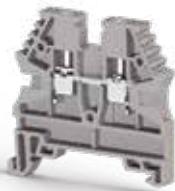

EASY RAIL MOUNT AND ASSEMBLY

AVK RD series earth terminal blocks provide easy and screwless installation on the rail. For this reason, they are fast and economical, compared to standard screw type earth terminal blocks.

CPB Series Terminals

CPB Series Ring and Fork Type Plug inTerminals are suitable for heavy industries and provide practical safe connection. For series, cable assembly is done with insulated ring type terminals. With this feature, they are preferred in iron and steel plants, mining industry and medium voltage modular units. CPB Series provide cross section for 6 mm². Comb connector and End plate are available. Special Marking solutions can be provided by Plotter labeling.

Cable assembly for CPB Series is done with insulated fork type terminals.

CPB Series provide cross section for 6 mm².

Special Marking solutions can be provided by Plotter labeling.

High Current / PB Series / Bolt Connection Terminals

AVK Series Screw Connection High Current Terminals provide 50 240 mm² cross-section range. Cross Connection can be used for terminals with all cross-sections. These terminal blocks are fixed to each other via pins on sides, providing a rigid performance on DIN Rail and easy montage advantages in constricted environments where connection with Insulated Terminals are difficult. EK-6 terminals are used for taking additional cable (for signals etc.) from high current (big cross sectioned) terminal blocks. Marking solutions can be provided by Plotter Labeling.

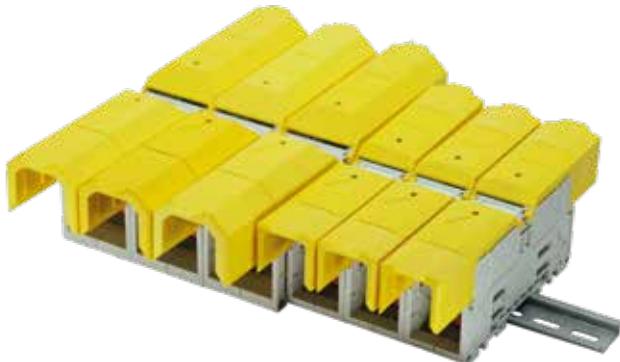

For the panels where connection on din rails are not possible, AVK PB Series Screw Connection High Current Terminal is a good alternative where it can be mounted directly into the base of the cabinet with screws. These terminals have all the same features as High Current Terminals mounted on DIN-Rail. Special Marking solutions for each cross section can be provided by Plotter Labeling.

The Klemsan PAK Series Terminal Blocks provide high current carrying capacity and ensure secure connections, as they are:

- Fully insulated with its cover and enclosure structures
- In compliance with EN 45545-2 and UL-94 standards
- In the V0 inflammability class
- Compatible with different cable lugs

Screw Type Multilevel / Sensor Terminals

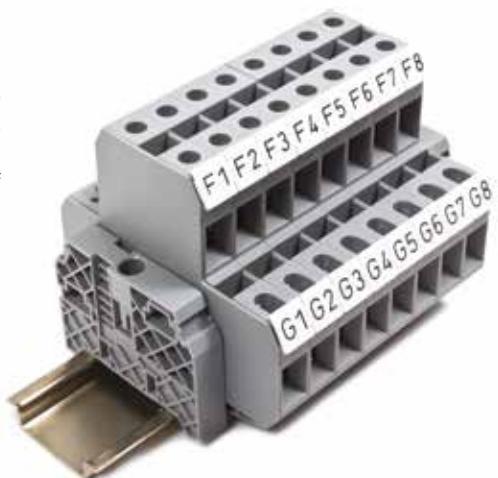

PUK Series Screw Connection Sensor Terminals are making sensor connections, which are often used in industry, more practical and esthetic. Provide individual cross connections for each layer, time saving in mounting process. Terminals can be used with NPN and PNP types of sensors. Special Marking solutions for each cross section can be provided by Plotter Labeling.

50% space saving

PIK Series Screw Connection Double-Deck Rail Terminals provide 2,5 - 4 - 10 mm² cross-section range. Double wiring density available without extension of mounting rails. Interconnection / shorting can be done at both layers. Special Marking solutions for each cross section can be provided by Plotter Labeling. The color of products can be selected from the color table.

Fine strand wire up to 16 mm² cross-section can be used in panels with limited space. PIK series terminals allow you to make more connections in less space. Usage with Cross Connections gains features of distribution block. Special Marking solutions for each cross section can be provided by Plotter Labeling.

Double Deck Earth Terminals can be used in panels with limited space. Multipole connection on a single block and cross connection on both levels provide practical Earth connection. Special Marking solutions for each cross section can be provided by Plotter Labeling.

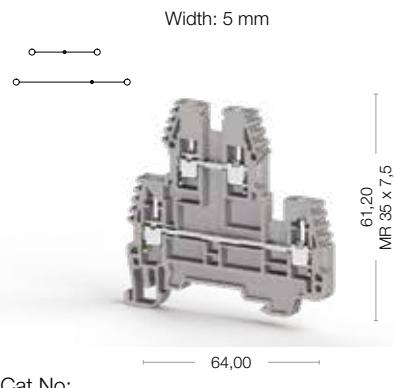

PUK Series Screw Connection Multilevel terminals provides solutions for different users' needs. They are ideal for limited spaces with their compact designs. In panels which exist switch lines & lightening, provide phase-neutral-Earth connection in one terminal. PUK Series are ideal for usage in industries where motors are working a lot, with practical wiring. Cross connection can be used on each level.

Special Marking solutions for each cross section can be provided by Plotter Labeling.

Screw Connection Disconnect / Test and Disconnect / Fuse Terminals

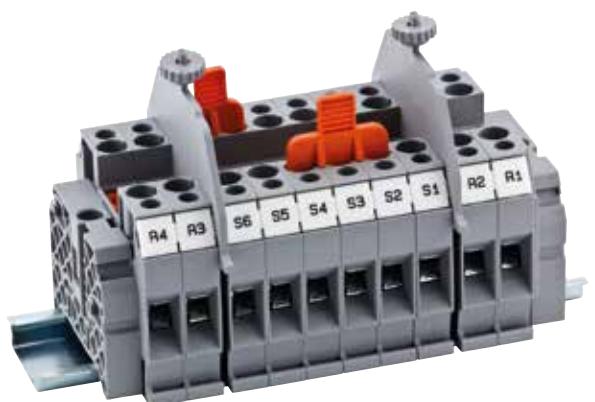

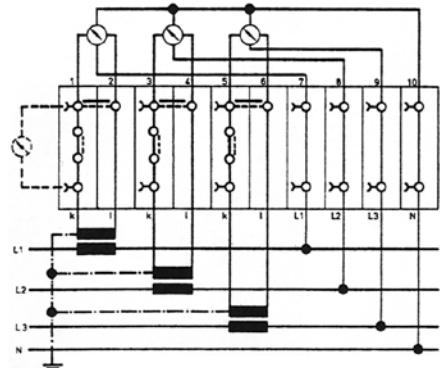

WGO Y Series Test and Disconnect Terminals provide safe connection with spring force under the contact of the terminal block. Practical accessories like sliding cross connection system, isolated Test Sockets, Test Plugs and Comb Connectors are available. Special Marking solutions for each cross section can be provided by Plotter labeling.

Screw Connection Fuse Rail Terminals can be used with glass fuse between 1A...10A. The fuse inside of the terminal is easily mounted and dismounted, and is an ideal solution when there is a necessity to change it even when the power is on in the system. Marking solutions can be provided by Plotter Labeling.

WGO Series Test and Disconnect Terminals are used to perform required tests without switching off the power in the system. These products are installed at the secondary side of current transformers, and thus, electrical ratings can be observed by testing equipment connected to the product. Practical accessories like sliding cross connection system, isolated Test Sockets, Test Plugs and Comb Connectors are available. Special Marking solutions for each cross section can be provided by Plotter labeling.

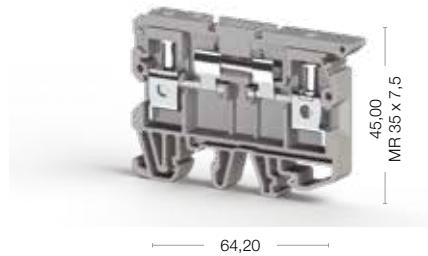

WGO PB series Ring and Fork Type Plug inTerminals provide practical safe connection. For WGO PB series, cable assembly is done with insulated ring type terminals and the terminal blocks have two test sockets. Practical accessories like sliding cross connection system, isolated Test Sockets, Test Plugs and Comb Connectors are available. Special Marking solutions for each cross section can be provided by Plotter labeling.

Knife Disconnect System, enables Screw Connection Disconnect Terminals to switch energy in the system. Marking solutions can be provided by Plotter Labeling.

WGO 6 Test and Disconnect Terminals

Complying EN 45545-2 European railway standard for fire safety classes R22-R23-R24-R26 for HL 1 – HL 2 –HL 3

- 6mm² Closed Type Test and Disconnect Terminal Block, no need for an extra end plate usage.
- Insulation Material V0 PA complied with UL 94
- Suitable for 4mm diameter test plug with preformed self socket. No need for a socket and test socket model selection, test plug can be inserted directly.
- Test Socket color coding is possible thanks to WGO 6KP coding plastics.
- WGO 6PK ensures the Sliding Disconnect Bridge safety with exact positioning. When the circuit is disconnected, you can use WGO 6PK as a safety isolation to prevent unexpected tripping and arcing.
- Suitable for 11.2mm marking strip.
- Din rail mounted ATCS 6 cross connection holder prevents possible accessory loss for SCS 6 and CS 6, when they are not in use.

CS type (2-3-4-5-10 poles) accessories are push-in cross connectors, SCS type (2-3-4 poles) accessories are longer push-in short-circuit connectors. In case there is no accessory holder (ATCS 6) usage, SCS type connectors can be mounted upside down to same connection holes to prevent any accessory loss.

Double Level Electronic Terminals

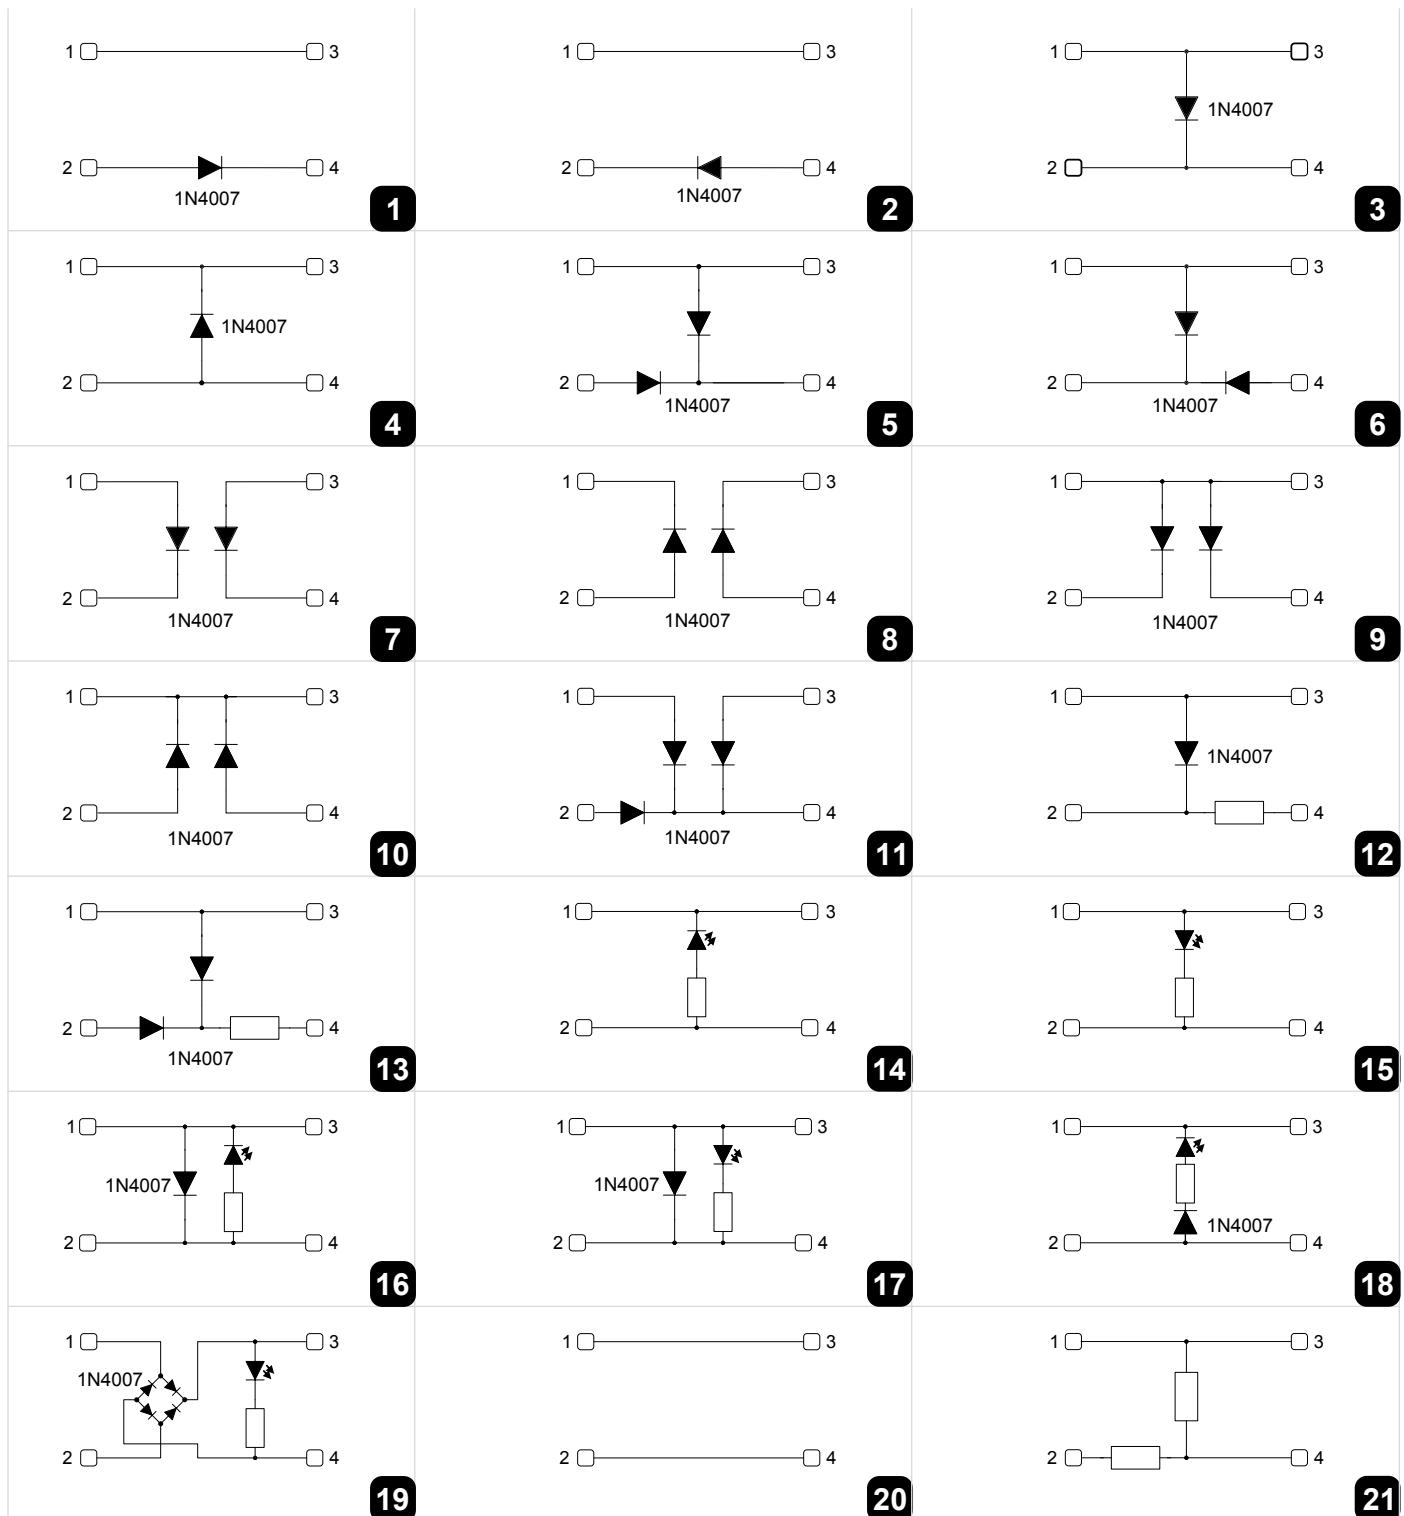

WG - EKI

From reverse current protection to lamp test circuit, you can select among 20 ready to use circuits of WG EKI-N, or choose the empty one and apply your own circuit. There are many choices with different number of contacts and housing type suitable for your needs. Spring clamp connections speed up the cable installations whereas plug-in cross connectors provides easy and safe connection. New WG EKI-N series terminal blocks can be labeled by using plotter or thermal marking systems.

Easy Mounting of PYK Series Terminals

Solid/stranded cables (with ferrules) are connected to the terminal just by pushing-in, without the need to use a screwdriver. The patented design of its spring provides fast and safe connection in heavily vibrating environments.

PYK Series Disconnect Terminals

Knife Disconnect System, enables Practical Spring Clamp Disconnect Terminals to switch energy in the system. Marking can be done with marking strip printed on Thermal printer, using Klemark Software.

PYK Series Fuse Terminals

Practical Spring Clamp Fuse Terminals has a sliding type hinged carrier that has a specially designed space for cartridge type glass fuse of size Ø5x20 or Ø5x25 together with a spare one. Easy cross-connection can be done by the help of Push in type Practical Cross Connection. Accessories facilitating Plotter labeling are available.

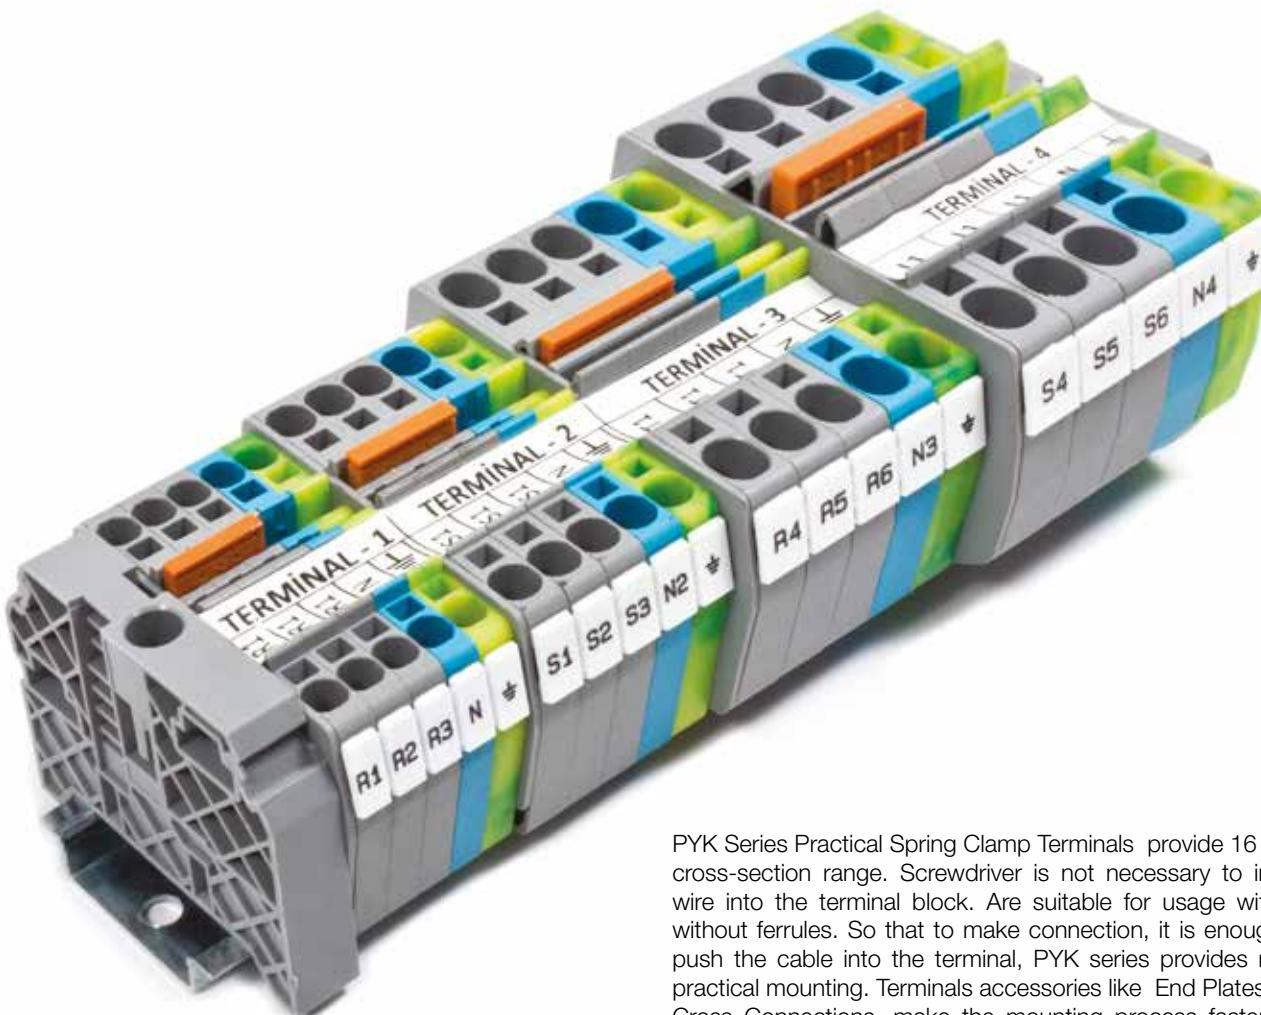

PYK Series Multilevel Terminals

Practical Spring Clamp Multilevel Terminals are used to perform connection of wires in limited spaces, 2-3 times more connections can be done at the same space on the rail.

Cross-connection can be done between the layers. Marking is possible at each layer, at the same time usage of group marking carrier makes marking even clearer and visible.

PYK Series Terminals

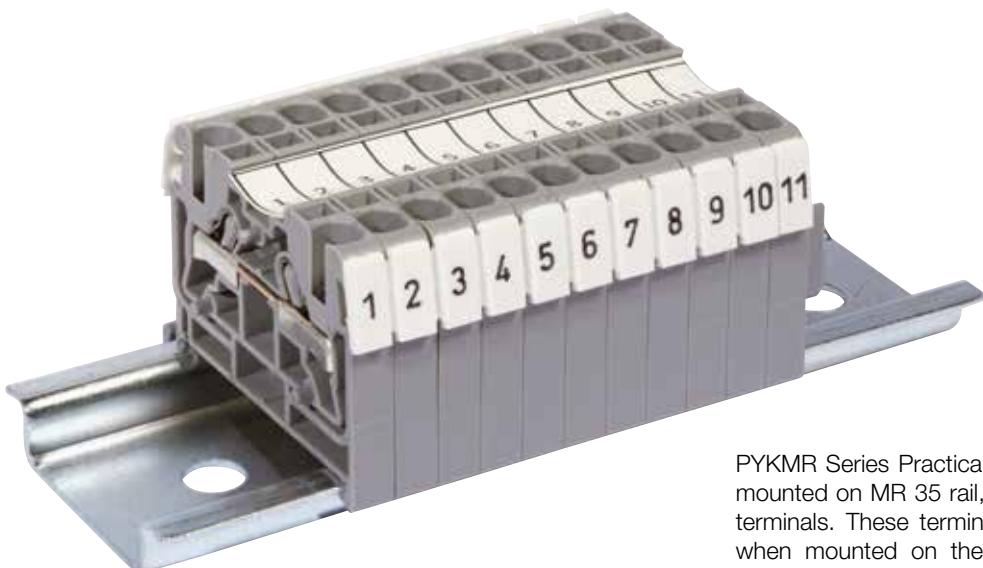

PYK Series Practical Spring Clamp Terminals provide 16 mm² cross-section range. Screwdriver is not necessary to install wire into the terminal block. Are suitable for usage with or without ferrules. So that to make connection, it is enough to push the cable into the terminal, PYK series provides more practical mounting. Terminals accessories like End Plates and Cross Connections, make the mounting process faster like in Test Terminals. Special Marking solutions for each cross section can be provided by Plotter labeling and with marking strip printed on Thermal printer, using Klemark Software. PYK Test Terminals, produced with the test and control aim, can be labeled with thermal marking strips and standard Dekafix markings.

PYKM Series Practical spring clamp mini Terminals, mounted on MR 15*5,5 rail, provide both feed-through and Earth terminals. These terminals can be connected to each other when mounted on the din rail and have safe connection. Practical Spring Clamp mini Terminals enable fast solutions on narrow spaces. Marking solutions are available with Thermal Printer labeling and Plotter labeling.

PYK Series Earth Terminals provides 16 mm² cross-section range. Screwdriver is not necessary to mount the terminal block on the rail. Mounting is more time-saving and practical. Yellow-Green color of the insulation body provides easy identification out of other Terminals. Side-by-side mounting on DIN-Rail with feed-through terminals for same cross-sections is possible with good visual effect. Special Marking solutions for each cross section can be provided by Plotter labeling and with marking strip printed on Thermal printer, using Klemark Software.

PYKMR Series Practical spring clamp mini Terminals, can be mounted on MR 35 rail, provide both feed-through and Earth terminals. These terminals can be connected to each other when mounted on the din rail and have safe connection. Practical Spring Clamp mini Terminals enable fast solutions on narrow spaces. Marking solutions are available with Thermal Printer labeling and Plotter labeling.

PYK Series Multilevel Rail Terminals

Double Deck Practical Spring Terminals are available in 2,5 - 4 mm cross section range. Double wiring density available without extension of mounting rails. Interconnection / shorting can be done at both layers. Group marking carrier is used to provide more visual marking in base layer. Special Marking solutions for each cross section can be provided by Thermal Printing and Plotter Labeling.

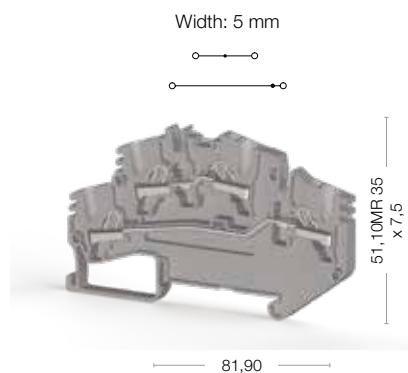

Multilevel Practical Spring Terminals make wiring more practical, reduce the installation costs and speed the wiring. Panels which exist switch lines & lightening, provide phase-neutral-Earth connection in one terminal. Are ideal for usage in industries where motors are working a lot, because of more practical wiring. Provide individual cross connections for each layer. Group marking carrier is used to provide more visual marking in base layer. Special Marking solutions for each cross section can be provided by Thermal Printing and Plotter Labeling.

PYK Series Sensor / Fuse and Disconnect / Disconnect Terminals

Practical Spring Clamp Fuse Terminals has a sliding type hinged carrier that has a specially designed space for cartridge type glass fuse of size Ø 5x20 or Ø 5x25. Both sides of the terminals are closed and available for cross connection. Special Marking solutions can be provided by Plotter Labeling.

Practical Spring Terminals are making sensor connections, which are often used in industry, more practical and esthetic. All PYK series with single layer are available with marking strip printed on Thermal printer, using Klemark Software. Terminals can be used with NPN and PNP types of sensors. Special Marking solutions for each cross section can be provided by Thermal Printing and Plotter Labeling.

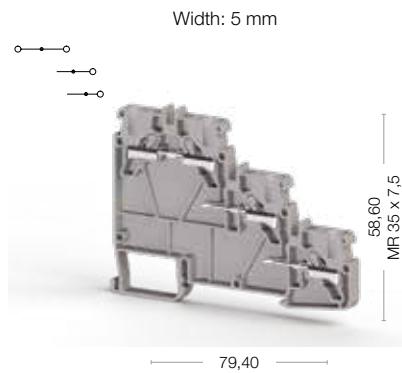

PYK series Disconnect Terminals enables to safely open-close the circuit , when the energy is on in the system. Can be marked with Thermal marking strip and cross-connected together with all other single-level terminals. Special Marking solutions can be provided by Thermal Printing and Plotter Labeling.

PYK Series Multi input/output Terminals

PYK Series One Input - Two Output Two Input - Two Output Terminals

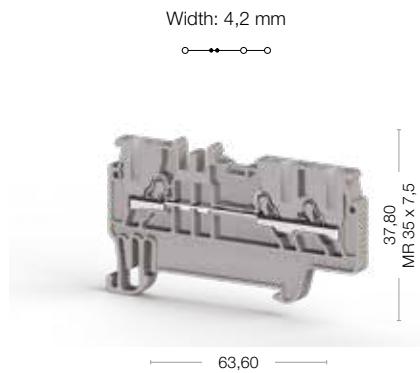

PYK Series Multi Input/Output Terminals make wiring more practical, reduce the installation costs where double and multilevel terminals cannot be used in the panels. Marking is available with all single layer PYK type terminals. Terminals can be used with test terminals and cross connection is available. Have same features in Earth terminals with same cross sections. Special Marking solutions for each cross section can be provided by Thermal Printing and Plotter Labeling.

MYK Series Spring Clamp Terminals

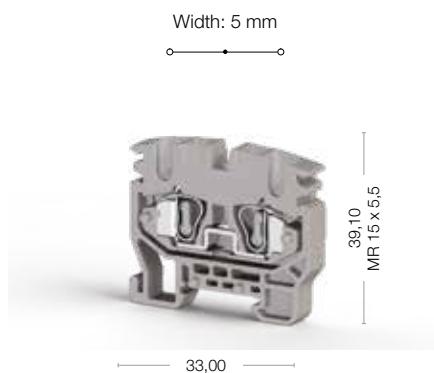

MYK Type Mini Terminals are available in 2,5 mm² cross-section. Can be mounted on MR 15x5,5 mm DIN-rail or directly on a flat surface. Earth Terminals, accessories, suitable for each usage, like End Plates and Cross Connections, make the mounting process faster. Marking solutions can be provided by Plotter. MYK series offer ideal solutions to projects which have narrow and limited space in panels, junction Boxes.

“V0” Flammability Rating Product Range

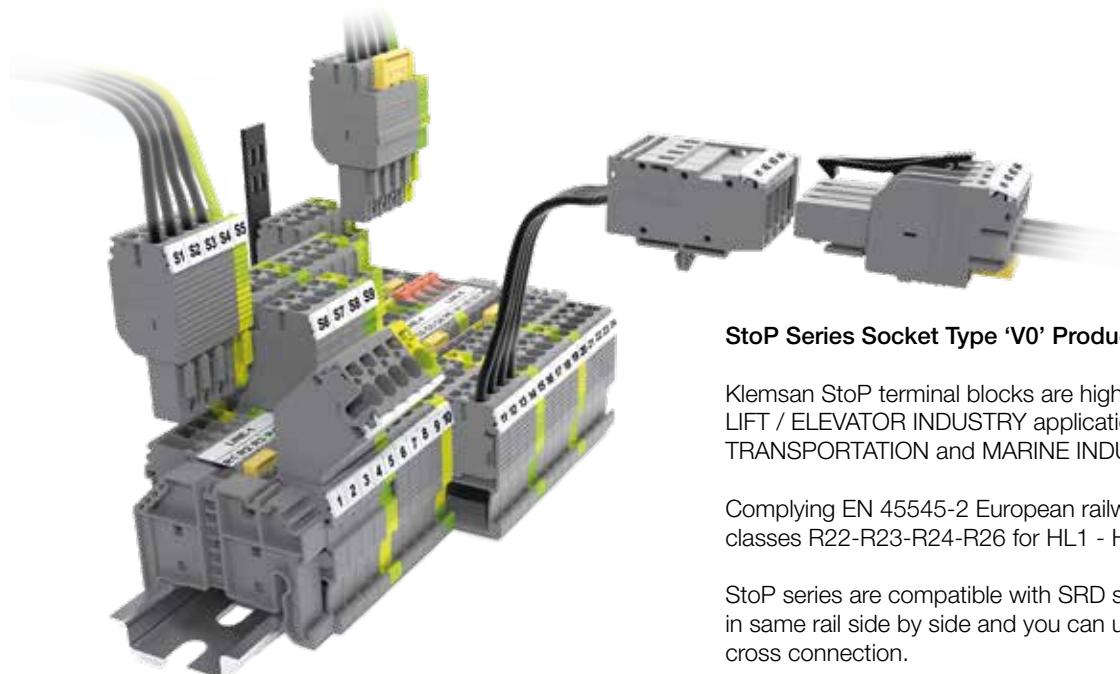

Screw Type ‘V0’ Products

‘V0’ flammability rating Screw Terminal Blocks are ready in KLEMSAN Family for your prestigious projects! You can select the most suitable products from our premium ‘NM’ series as 108 products.

Complying EN 45545-2 European railway standard for fire safety classes R22-R23-R24-R26 for HL1 - HL2 - HL3 Hazard Levels.

Features	UL 94 V0	UL 94 V1	UL 94 V2
Self-extinguishing time after flame is applied to the sample (seconds).	≤ 10 sn	≤ 30 sn	≤ 30 sn
Total self-extinguishing time after 10 consecutive flame treatments.	≤ 50 sn	≤ 250 sn	≤ 250 sn
Is the sample burn completely?	No	No	No
Subject material which shouldn't ignite by dripping from the sample.	Cotton	Cotton	Paper

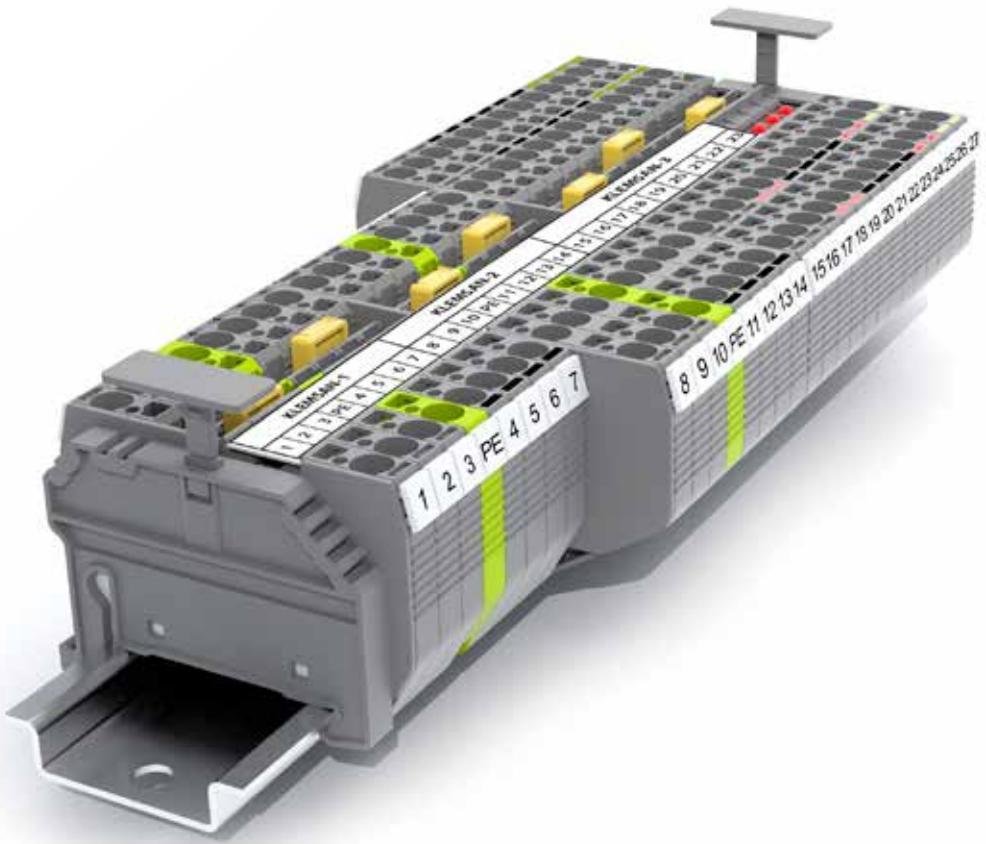

StoP Series Socket Type ‘V0’ Products

Klemsan StoP terminal blocks are highly recommended for LIFT / ELEVATOR INDUSTRY applications; also for RAILWAY TRANSPORTATION and MARINE INDUSTRIES as well.

Complying EN 45545-2 European railway standard for fire safety classes R22-R23-R24-R26 for HL1 - HL2 - HL3 Hazard Levels.

StoP series are compatible with SRD series. You can mount them in same rail side by side and you can use marking strip and push-in cross connection.

SRD Series Spring Type 'V0' Products

Brand new series spring clamp type terminal blocks are ready for your projects!

SRD Series are empowered terminal blocks compare with YBK series.

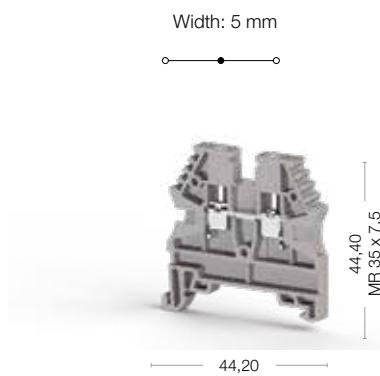

The thickness is 5,2 mm and the plastic bodies and rail legs are more ergonomic.

Complying EN 45545-2 European railway standard for fire safety classes R22-R23-R24-R26 for HL1 - HL2 - HL3 Hazard Levels.

SRD Series Terminals

**Complying EN 45545-2 European railway standard for fire safety classes
R22-R23-R24-R26 for HL1 - HL2 - HL3**

**This is to certify that representative samples of the product as specified
on this certificate were tested according to the current UL requirements.**

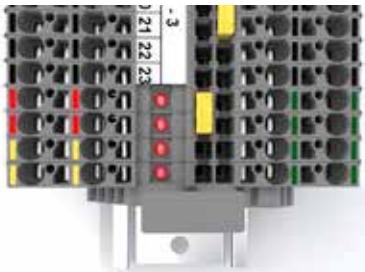

Thanks to new ergonomical design and used push-in cross connections, SRD Series have quicker and easier rail mounting advantages compared with YBK series.

You can select special types SRD Series terminals (such as Led, Diods... etc) from the range for your various applications.

SRD Series can be marked with marking strips, printed with thermal transfer printers. Single floor terminals can be marked with 11.2 mm strip labels, and double floor terminals can be marked with 4.9 mm strip labels.

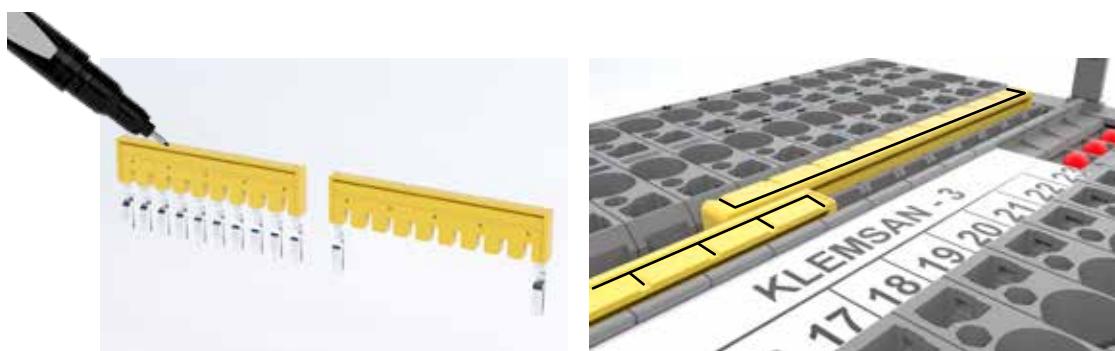

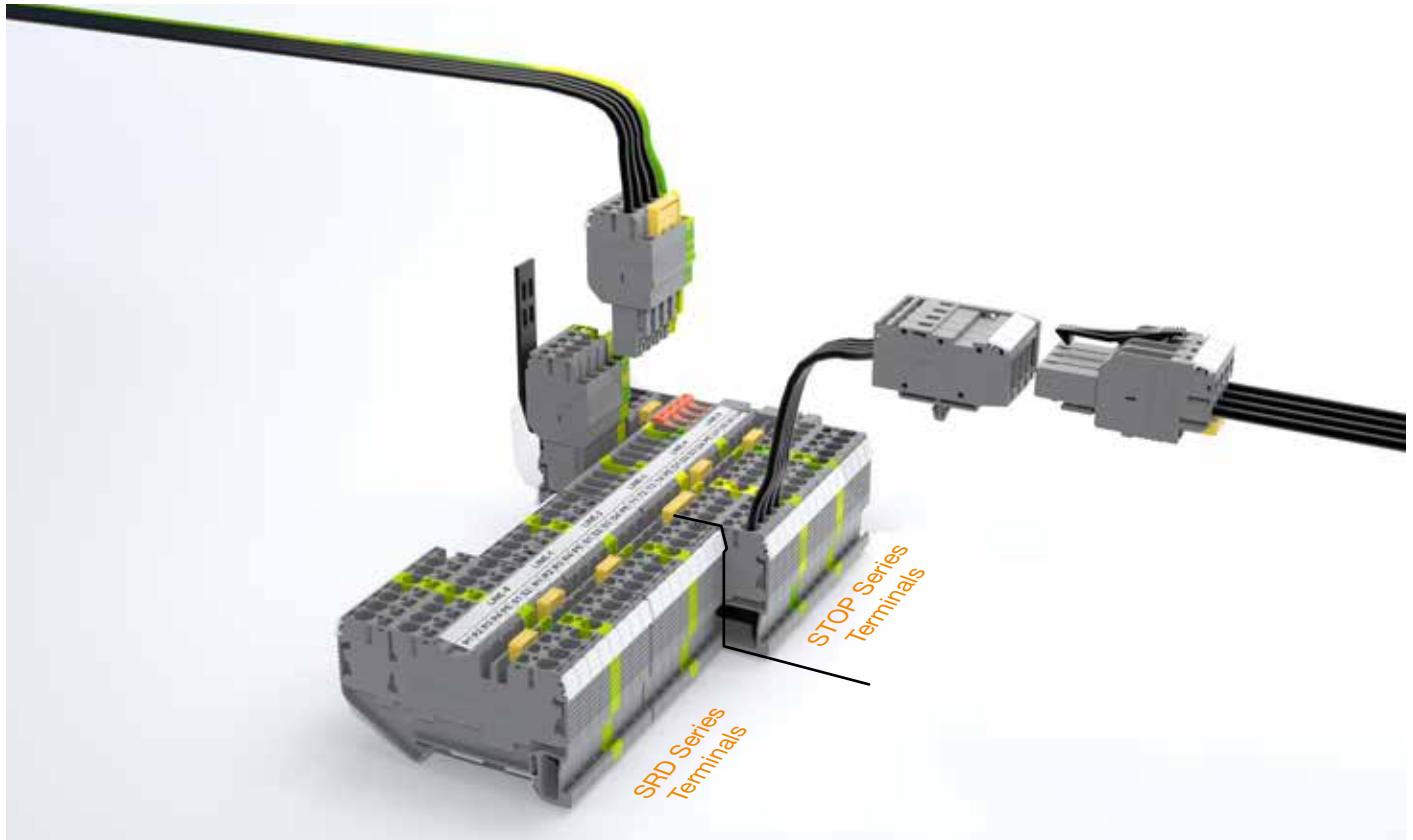

- | | |
|--|------------------------|
| [Green] (Red +) and (Red -) ..V/DC and Diode Version | |
| [Blue] (Blue) | : Neutral Connections |
| [Black] (Black) | : Combined Connections |
| [Yellow] (Yellow) | : Combined Connections |

Wire Assembly for Terminals:
Wires can be assembled quickly and easily by opening the spring cage with suitable screwdriver

Cross Connection:
Thanks to dual cross connection ability, user can make continuous cross connections. Same cross connections can be used together with STOP series even on same din rail Project. You can use permanent markers to indicate poles on cross-connectors.

**Complying EN 45545-2 European Railway
Standard for fire safety classes R22-R23-R24-R26
and Hazard Levels HL1 - HL2 - HL3**

DIN Rail Mounting

Airborne connection terminals can be used on DIN rails as well as the other rail terminals with different sized structures.

Klemsan StoP terminal blocks are
highly recommended
for **LIFT / ELEVATOR INDUSTRY**
applications; also for
RAILWAY TRANSPORTATION and
MARINE INDUSTRIES as well.

By using our brand new series Klemsan StoP Terminal Blocks, you can easily build your signal or power circuits with plugs and sockets. Besides DIN Rail mount types, you can also make coupling of terminals without any DIN Rail fixing. The new StoP terminals enable users to intervene energy breakdowns quickly, making tests faster and safer.

- By using pin locks, user can match the right plugs and sockets. This prevents misconnection.
- Plugs and sockets can be purchased separately to make customized sets.
- Same cross-connectors can be used for both terminals and sockets.
- User can use either strip labels or marking tags for the proper marking of the terminal block set.

Custom Solutions for Processes

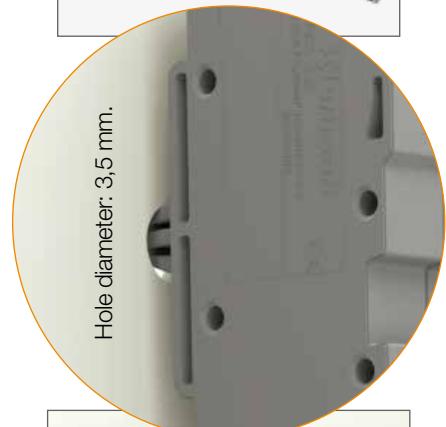

Cross-Connection

It is possible to make dual cross-connections on terminals and same cross-connectors can also be used for sockets. You may use permanent markers to indicate poles on cross-connectors.

Socket Locks

Extra optional locks prevent your circuits from excessive vibrations. Sockets can be removed from terminals by simply pushing the clip upwards.

Wire Assembly for Terminals

Wires can be assembled quickly and easily by opening the spring cage with the suitable screwdriver.

Cable Tie Mount

You can use a cable tie to hold all cables together assembled to the socket by using cable tie mount.

Airborne Connection

Airborne connection terminals can be used for making quick and safe connections inside the panels or installation ducts.

Pin Coding

Use orange pins on terminals to prevent the misconnection of sockets.

* All dimensions shown are in millimeters.

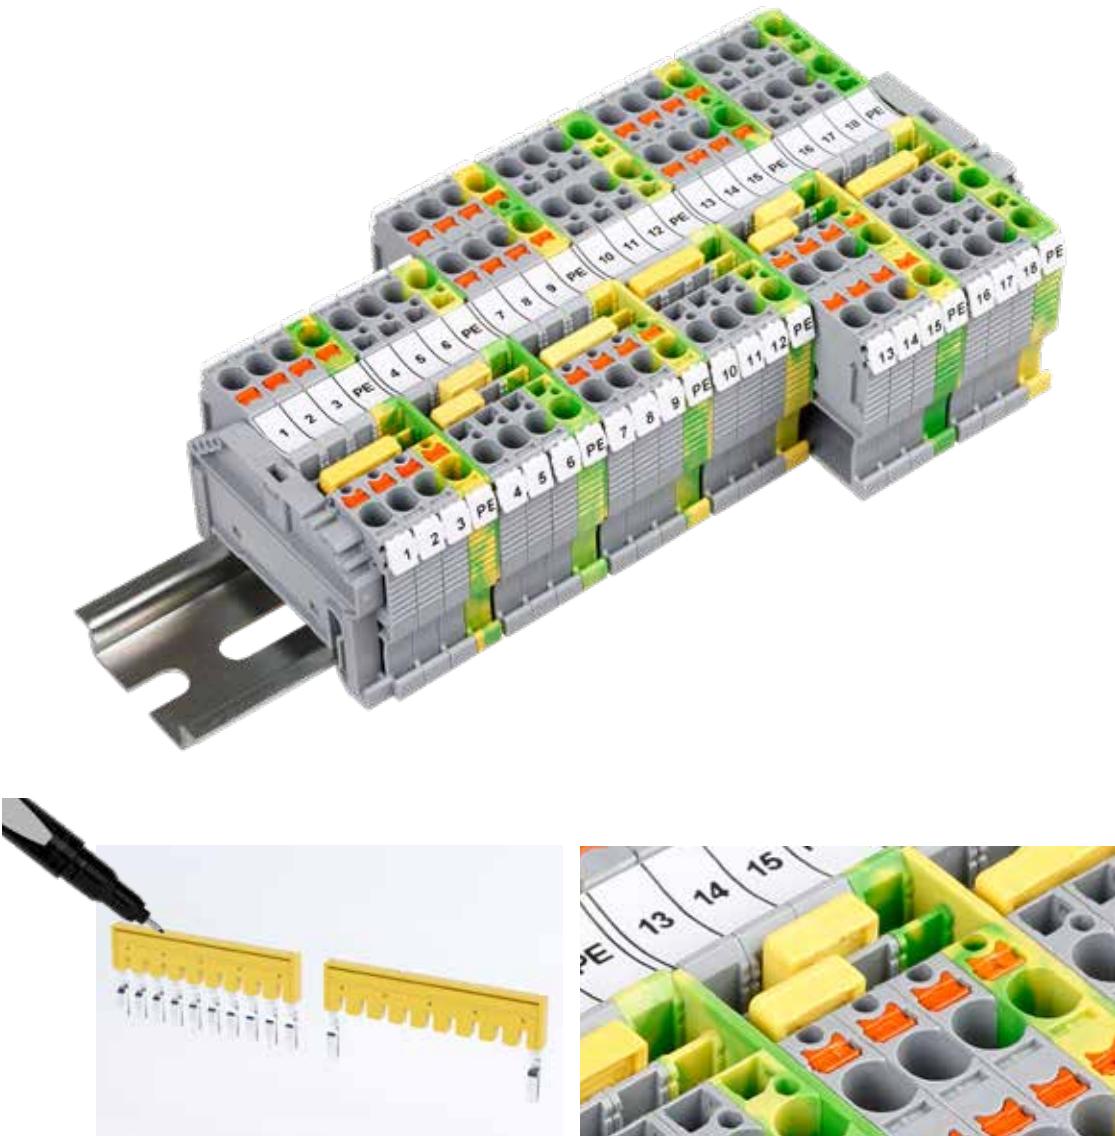

PRD Series Terminals

PRD Push-In Terminal Blocks can be connected wires from 0.08 mm² (28 AWG) cross-section up to 25 mm² (4 AWG)

PRD Series Push-In Terminal Blocks not necessary the use of screwdrivers for conductor assembly. Pushing the wire that meets the specified conditions into the terminal blocks completes the assembly. While removing the conductor, disassembly is carried out by applying pressure to the orange button with a suitable screwdriver. Single-core, stranded and ferrule conductors can be connected without any problems without using a hand tool.

Dimensions and wire entries are the same as SRD Series Cage Clamp Spring Type Terminals. Single-layer versions 11.2 mm; Multi-layer versions can be marked with a 4.9 mm strip label.

Thanks to dual cross-connection ability, user can make continuous cross connections. Same cross connections can be used together with SRD Series even on same Din Rail Project. You can use permanent markers to indicate poles on cross-connectors.

PCY Series Terminals

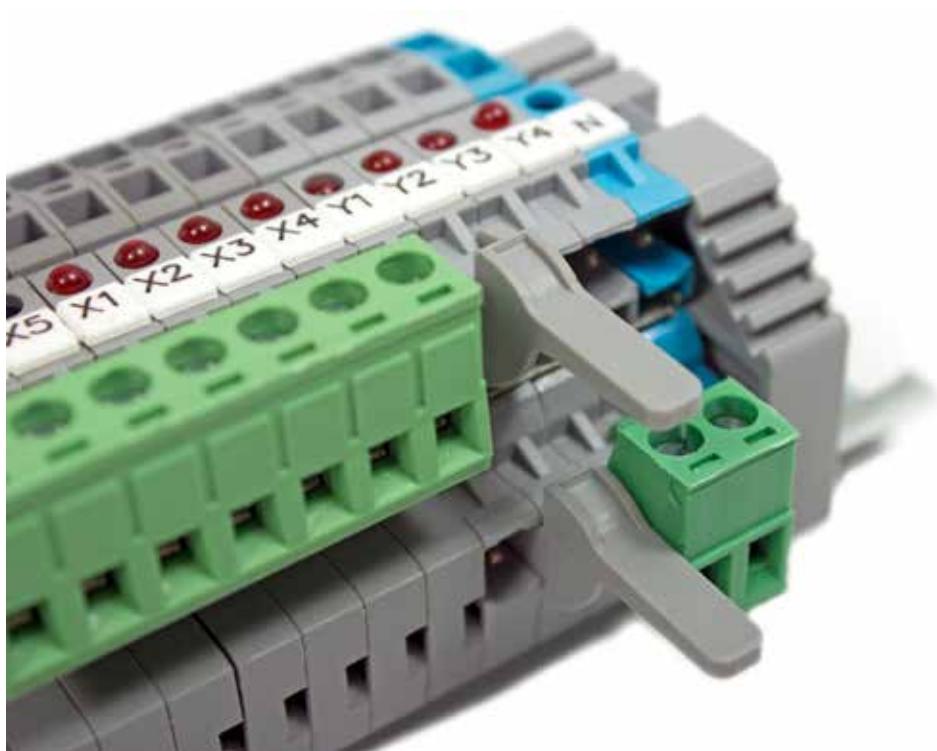

PCY Series Spring Clamp Type Terminals can be used together with PCB Terminals with the pitch of 5,08 mm. LED terminal can be selected according to specified operating voltage of the product. Time-saving and safe accessories like push-in cross connections, Insulation plugs for unused socket outputs to prevent finger touch, End Plates are available. Special Marking solutions can be provided by Plotter Labeling.

AVK 2,5 PC Series Terminals

AVK 2,5PC Screw Type Terminals can be used together with PCB Terminals with the pitch of 5,08 mm. Time-saving and safe accessories like comb and screw type cross connections, Insulation plugs for unused socket outputs to prevent finger touch, End Plates are available. Special Marking solutions can be provided by Plotter Labeling.

Terminals Strips

- The product in the figure is the new psk 1/2 terminal strip.
- For allowing marking, label slots are designed according to DB 5 and DG 6/5 Marking Tags (Dekafix)
- Assembly of the terminal should be made with maximum 3 mm Width screw.

THERMAL PRINTING SOLUTIONS

Software

KlemarkPRO is developed by Klemsan in order to manage all kinds of marking projects through one software.

- Easy setup. Operator needs only basic computer skills.
- Compatible with all Klemsan printers.
- Provides high performance for printing all types of texts, symbols and images.
- Advanced features provide high-quality preview and quick operation.
- Graphic design and Klecard universal drivers can be automatically uploaded during set-up.
(Windows® compatibility.)

Marking Systems / Printers

We offer the most suitable solutions for your projects thanks to our thermal marking systems. You can experience the high efficiency and easy application with Klemsan Marking Systems which will definitely suit all your industrial requirements.

KLECARD Thermal Card Printer

Klecard Thermal Printer is the fastest and easiest way for marking a wide variety of labels and tags.

- Terminal Blocks
- Cables
- Panel Surface and Components
- All Kinds of Industrial Products and Devices

Windows® based driver will provide ease of use. Even smallest symbols, drawings, barcodes and QR Codes can be printed.

TE Series – Thermal Roll Printer

High-speed TE Series thermal transfer printer is designed for marking labels and tags within roll format. Light and compact design of the printer ensures the ease of use in the most challenging field conditions. All kinds of panel building components such as cable markers, terminal strip labels and other industrial labels can be marked with TE Series.

Hardware Requirements

CPU	32-bit / 64-bit Intel® or AMD® Processor
RAM	2 GB of RAM (4 GB recommended)
Disc Space (HDD/SDD)	4.0 GB of free disk space for installation
Display	15.6" monitor (17" recommended)
Input Devices	Keyboard, three-button mouse

Software Requirements

Operating System	Microsoft® Windows® Vista, 7, 8/8.1/10 with .NET Framework 4.0
Internet Browser	Microsoft® Internet Explorer®, Google Chrome™, Mozilla® Firefox®

Software Features

Reconfiguration Oriented Project

The marking project is a relational database which can be continuously reconfigured, by sorting and grouping different materials on different machines. You can modify, complete your project or adapt it to different system configurations in an efficient way with minimum effort.

Intuitive User Interface Compatible with MS-Windows Philosophy **WYSIWYG (What You See is What You Get)**

The user can manage records in a combined Tree-Grid view with sorting, filtering and grouping functions.

- Visual editing in preview screen and synchronization with the Tree-Grid view.
- Undo/Redo functions for project operations on records/project.
- Clipart collection of symbols by dragging and dropping into the project (in Graphic Mode).
- Simple Text and RTF (rich-text-format) editing capability on labels.
- Graphic Editor for labels with support for RTF, Barcode, QR-Code, circular text, vector and raster images.

Material Management

The material hierarchical (Tree-Grid) view allows direct selection into preview screen for visual editing.

Material and Custom Label Designer

Easy and functional geometrical label design and text attributes for Klemsan standard materials and customer predefined/layout labels. Smart way of assigning printing settings to each material from parameter database.

Strip / Endless / Ribbon Material Support

The Terminal Strip Editor is a powerful graphic editor with print preview capabilities for ribbon/strip materials.

Printer Settings

Printers management utility for assigning printers to materials category, also for defining the materials organization on each printer pad.

Print Settings

Capability for selection, copy factors, machine settings control during the printing process.

Page Printing Management

The pages to be printed can be viewed hierarchically (Tree-Grid) which allows label grouping or individual label selection.

International Language Support

The application fully supports UNICODE languages for the user interface and for the text to be marked.

KLECARD Thermal Card Printing

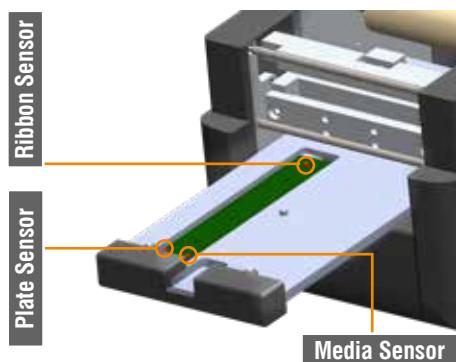

Order No	Product
806 000	Klecard Thermal Card Printer

The marking process has never been so effortless. Printing dozens of labels and tags just in seconds will give you an opportunity to complete your projects faster than what you plan. Klecard is the new amazing marking solution based on the thermal transfer print technology, which is alcohol-proof, smudge-proof and waterproof with no drying time. Klecard is so fast that you can print any kind of label card in less than 10 seconds with a huge thermal resistance level according to international standards. It is ideal for high volume applications with low-cost printing per card with a resolution of 300 x 600 dpi.

Terminal blocks, cables, panel components, buttons and many more products can be marked with our Klecard Printer thanks to our marking software Klemark-Pro.

Features

- Ribbon saving algorithm; ensures the optimal ribbon usage, lowering printing cost and maximizing efficiency.
- Built-in printhead integrity check; which automatically tests any printhead single element and ensures high-quality texts, symbols, barcodes and images.
- Perfect printing mode; which allows you to print different media types with the best settings of the printer (speed rate, printing intensity and ribbon control).
- Automatic temperature sensing; which controls the status of the printhead to adjust it at the best conditions depending on the operating environment climate.
- Sensing control; Klecard has three sensors to manage ribbon, plates and media. The machine will start printing only when the plate, the ribbon and media are placed on the machine.

Warning: The printhead working temperature condition is between 15-35 °C range.

Package Contents

- 1 KleCard Printer
- 1 Power Supply
- 1 Power Cable
- 1 USB Cable
- 1 Plate for Flat Media
- 1 Plate for Terminal Blocks Markers

TE Series - Thermal Roll Printing

Order No	Product	Hardware Connectivity
808 479	TE 300 (300 DPI)	USB
808 480	TE 310 (300 DPI)	USB, Ethernet, Serial RS-232, USB Host

TE Series has the same system as KLeCard – Thermal transfer system. TE Series is designed for roll form tags and labels whereas Klecard is designed for card shape media. TE Series labels are required to be polyester, paper or any kind of soft material which can easily pass through the thermal printhead. TE Series is the fastest and easiest way for high volume roll form labels printing with 300 dpi resolution. Three different sizes of black resin ribbons can be used with this printer.

Terminal blocks, cables, panel components, buttons, heat shrinkable sleeves and many more products can be marked with our TE Series Printer thanks to our marking software Klemark-Pro.

TE Series Hardware Features

Next generation high-performance TE Series desktop thermal printer, brings new standards in thermal printing and offers greater performance, compared to other printers in his field. The 4 inch series can simply print anything, tiny little symbols, numbers, graphics and barcodes for your applications; from cable marking with the smallest dimensions up to information cards for machine identification. Create high-quality, fast and durable labels for your marking needs.

- 1) Print speed up to 204 mm (8 inch) per second
- 2) 128 MB flash and 64 MB SDRAM memory
- 3) User-friendly, double-walled folding design
- 4) Serial cable, internal Ethernet,
- 5) USB 2.0 & USB Host standard
- 6) 300 meter ribbon compatible
- 7) ENERGY STAR®qualified

High Availability
Quick setup
Economic Printing

The printer offers the following optional features.

TE Series	User options	Dealer options	Factory options
Extended plate for external roll mount assembly with 3" core label spindle (8.4 OD)	●

General Specifications

Dimensions	204 mm (W) x 164 mm (H) x 280 mm (L)	
Weight	2.4 kg	2.5 kg
Electrical	External universal switching power supply Input: AC 100-240V, 2A, 50-60 Hz Output: DC 24V, 2.5A, 60W, LPS	
Environmental condition	Operation: 5 ~ 40°C (41 ~ 104°F), 25~85% non-condensing Storage: -40 ~ 60 °C (-40 ~ 140°F), 10~90% non-condensing	

Print Specifications

Print head resolution	300 dots/inch (12 dots/mm)	
Printing method	Thermal transfer and direct thermal	
Dot size (width x length)	0.084 x 0.084 mm (1 mm = 11.8 dots)	
Print speed (inches per second)	Up to 5 ips	Up to 5 ips
Print speed for peel mode	N/A	Up to 3 ips
Max. print width	105.7 mm (4.16")	105.7 mm (4.16")
Max. print length	1,016 mm (40")	11,430 mm (450")

Media Specifications

Label roll capacity	Max. 5" OD	
Media type	Continuous, die-cut, black mark, fan-fold, notch	
Media wound type	Outside wound	
Media width	20mm ~ Max. 112 mm	
Media thickness	0.06 mm (2.36 mil) ~ 0.19 mm (7.48 mil)	
Media core diameter	1" (25.4 mm) & 1.5" (38 mm) ID core	
Label length	5 mm ~ Max. printing length	
Label length (peeler mode)	N/A	1" ~ 6" (25.4 ~ 152.4 mm)
Label length (cutter mode)	N/A	1" ~ Max. printing length
Gap height	Min. 2 mm (0.09")	
Black mark height	Min. 2 mm (0.09")	
Black mark width	Min. 8 mm (0.31")	

Ribbon Specifications

Ribbon outside diameter	1i core: Max. 67mm 0.5i core: Max. 40mm	
Ribbon length	1i inner core: 300 meters 0.5i inner core: 110 meters	
Ribbon core inside diameter	0.5 and 1 inch	
Ribbon width	30 ~ 110 mm	
Ribbon wound type	Outside wound	

TE Series Printer and Accessories

Ribbons

- 1) Thermal transfer film (ribbon) and labelling material
- 2) Thermal transfer head
- 3) Printed label
- 4) Pressing roller
- 5) Used thermal transfer film (ribbon)

Plotter Consumables

PEN PLOTTER SYSTEM

Pen Plotter System is the labeling system which consists of one plotter and PC. System enables to label various kinds of tags by specially developed software. User can follow up by looking at the monitor and choose the right tag to be written easily. Marking is done on the standard polycarbon made blank tags which are resistible to rough environment conditions (dust, dirt and oil), frictions and ageing. System has a user friendly simple program working with Windows Operating System, and allows to import data from other files, such as E-Plan and Excel files.

K-R Type Plotter Pens and Ink

The refillable plotter pen K-R Type is available with six widths, used with etching ink. Ink cartridges containing special ink are suitable for marking, indentifying and labeling various plastics. It is fast-drying, smudge proof, light fast and resistant to spirits and petrol when used on suitable plastic material. It is possible to remove labels without damaging the underlying material by using the cleaning fluid.

Order No	Product	Width	Qty.
807 040	PLOT K-R 0,18 mm	0,18	1
807 041	PLOT K-R 0,25 mm	0,25	1
807 042	PLOT K-R 0,35 mm	0,35	1
807 043	PLOT K-R 0,50 mm	0,5	1
807 044	PLOT K-R 0,70 mm	0,7	1
807 045	PLOT K-R 1,00 mm	1	1

Order No	Product	Description	Qty.
807 070	PLOT KRT-P 1 ml.	5 x 1 ml. Cartridge	1

D Type Plotter Pens

The disposable plotter pen D Type is available with two widths. Once activated, pen should be kept in a dry, cool places, if not in use.

Order No	Product	Width	Qty.
807 921	KLM PLOTTER PEN - D 0,25 mm P 2.0	0,25	1
807 922	KLM PLOTTER PEN - D 0,35 mm P 2.0	0,35	1

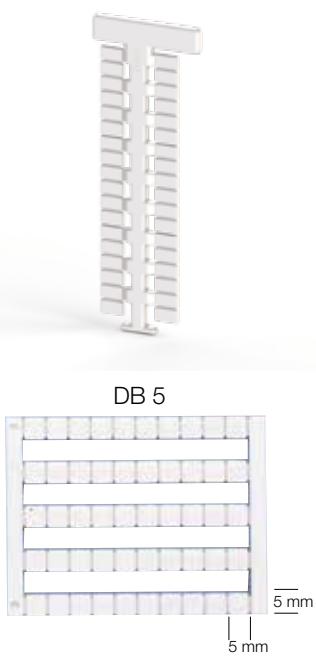

Eco Series Plotter Pens

Eco series hand pens are produced with one side 0,35 mm width, the other 0,70 mm width. That gives possibility to label by one pen tags for terminals and tags with bigger sizes.

Order No	Product	Width	Qty.
807 055	Pilot Hand Pen	0,35 -0,70	12
807 907	Adaptor Pilot Pen Small (for Terminal Block Labels)		1
807 908	Adaptor Pilot Pen Large (for Button Labels)		1

Slotted Wiring Ducts

HALOGEN FREE Wiring Ducts

- Flame-retardant, self-extinguishing according to UL94-V0
- EN50085-2-3-approved
- Colour: Light Grey: RAL 7035
- Temperature range from -25 °C to +90 °C

Preferred and applied in public areas, such as;

Hospitals

Multistory and
High Buildings

Mining Facilities

Railway Industries

Marine Industries

Hotels

Laboratories

Schools

Airplanes

Cinema and Theater
Halls

Subway and Highway
Tunnels

Shopping Centers

Airport Terminals

Slotted Wiring Ducts

Halogen Free For Highest Safety

Why Low Smoke Halogen Free (LSHF) products?

When PVC or other traditional plastics ignite in a fire, they emit corrosive & toxic gases like Chlorine. Moreover, these are soluble in moisture, forming Hydrochloric acid, which destroy electronics, semiconductors and intrinsic electrical circuits.

It can be fatally hazardous to humans if they cannot escape from the smoky area contaminated with toxic elements. Toxic fumes are not only a serious health risk but also cause serious damage and problems to crucial machineries.

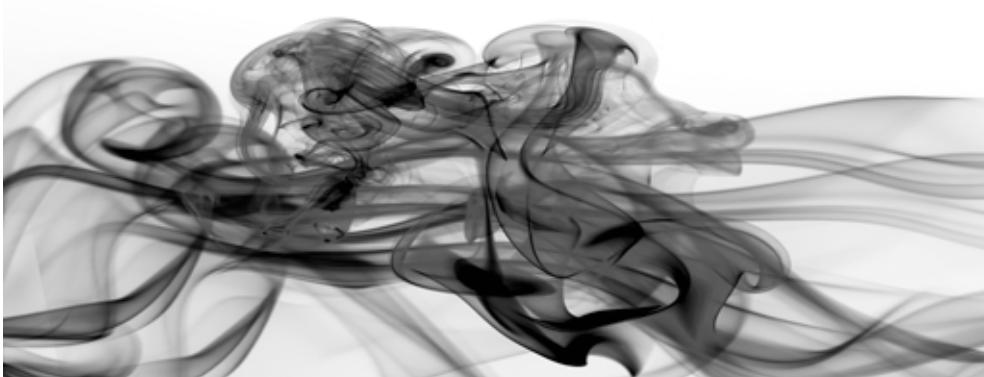

The Difference Between PVC and PC/ABS

Due to its high level of flame-retardancy, PVC has been used as an appropriate cable insulation material for many years. However, in the event of a fire this will generate dense black smoke, with toxic and corrosive gases that can cause fatality and destruction.

 PC/ABS passes the Halogen free tests and Low Smoke tests **successfully**.

Halogen Free wires and cables are already compulsory in many areas as they are safer. In the same way, Halogen Free Wiring Duct is especially important to be used in closed areas where the exits are limited; such as Public Transport, Hospitals, Malls etc.

PVC generates **dense black smoke** when it burns

EN 45545-2 European Union Standards Fire Testing to Railway Components

KLEMSAN offers a wide range of Wiring Ducts in materials that are compliant with the smoke generation and toxicity requirements of the **EN 45545-2** European Railway Standards for fire safety classes **R22 - R23** and Hazard Levels **HL1 - HL2 - HL3**.

Vehicles are classified as: HL1, HL2 or HL3, depending on their time in tunnels and the availability of sleeping cars. The HL1 classification represents the lowest hazard level and HL3 represents the highest. Please refer to EN 45545-2 for definitions.

LSHF Material Properties - PC/ABS Raw Material

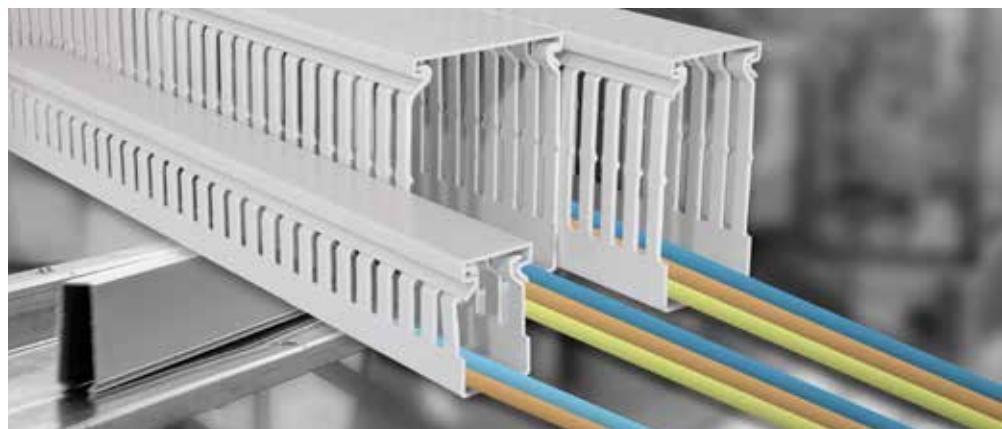

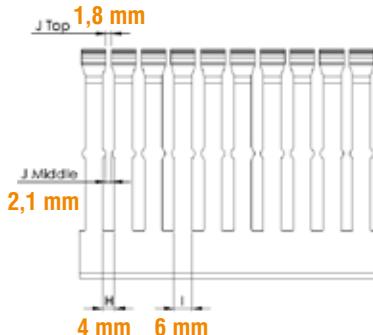

Our Halogen Free Wiring Ducts are made of a special purpose LSHF and flame retardant PC/ABS blend containing **NO Bromide, NO Chlorine and NO Fluorine**. It still offers high impact resistance and excellent characteristics used for higher temperature applications. These are in compliance with **EN 45545-2** European Union Standards.

LSHF material also has characteristics of self-extinguishing, UL94 flammability rating of V-0. It is RoHS compliant, environmentally safe and is 20% lighter than PVC.

Our LSHF material is resistant to abnormal heat and fire. It has proven dimensional stability between **-25 °C / + 90 °C**. Also, the Halogen Free Wiring Ducts are manufactured in compliance with the Standard EN 50085-2-3. Ideal for applications where public safety during a fire is a concern.

- Excellent fire-safety characteristics.
- Smooth, burr-free edges protect installers from injury and wires from damage.
- Ribs can be removed easily thanks to upper scorlines.
- Lower scorlines at base of sidewall allow cutting out and removing sections of sidewall with no sharp edges.
- Duct covers hold securely even in a vertical position and under vibration.
- **Wiring duct covers are included the package.**

Slotted Wiring Ducts

Klemsan “Trunkie” PVC Wiring Ducts

Solutions Which Simplify Wiring

- Now wire management is much easier.
- You can easily mount wire retainers on the bottom rail of the duct without screw and slide them along the rail.

Durability and Reliability

- Assembly or disassembly of the covers is the most difficult operation when ducts are fully wired, design of Trunkie speeds up your work.
- Trunkie enables the customer to use the maximum inner space of the duct and keeps the rigidity even at maximum load of cables.

Appearance

- Special rib pattern allows the end-user to make cable grouping easier.

Speed and Efficiency

- Furthermore, Trunkie helps you save time while breaking off ribs in groups.
- Without using any hand tools,

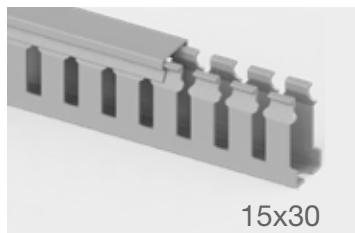

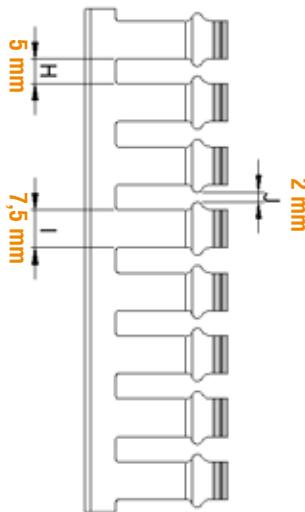

simply bend the duct ribs to 60° - 90°

and easily break them inside the panel.

- Can be used with cable tie thanks to additional holes on the sides.
- Flame-retardant, self-extinguishing according to UL94-V0
- Upper scorline is available for breaking off the ribs.
- Lower scorline is available.
- Operating Temperature: -15°C to 60°C
- Standard Length: 2 meters
- Color Option: RAL 7030 Grey
- Complies with RoHS regulations.
- Complies with IEC 60695-2-1 and EN 50085-2-3 standards.

* Wiring duct covers are included the package.

Electronic Products

Time Relays Series

Klemsan new Z1x series time relays offer optimum solutions in various industrial applications with different function options and with 12-240 V AC/DC (universal input) wide supply range.

It is suitable for use in narrow panels with its new body design under the DIN norm.

In addition to single-function devices, there are up to 10 function options that can be controlled via trigger input, based on the model. Time settings can be made easily with the trimpots on the device between 0.1 sec to 10 days.

Special functional relays such as star-delta, left-right, etc are also available in the product portfolio.

- 12-240 V AC/DC universal supply range
- 18 mm enclosure design under DIN Norm and design under IEC 61812-1 standard
- Support for up to 10 functions based on model
- 0.1sec – 10 days wide time range
- Power-off delay function adjustable for up to 2 hours
- Relay output (10A)
- High mechanical endurance
- Function control via trigger input
- LED notifications

Electronic Products

Protection & Monitoring Relays Series

Klemsan protection and monitoring relays in new enclosures under the DIN norm, are designed to protect your system against problems caused by voltage, frequency, and temperature in single-phase and three-phase electrical systems.

In addition to fixed protection models that do not require any adjustments, some products allow asymmetry, voltage protection, protection parameter selection, and time setting adjustment over trimpots on the device

- System errors can be monitored thanks to the LED notifications that indicate errors.
- Product design under TS EN 60255 standard,
- 18mm thin product body under DIN standard,
- TRMS measurement,
- Red LED indicators for error notification,
- Orange LED indicator for relay status,
- Adjustable pots for time and limit values,
- 5A SPDT relay output,
- Optionally Asymmetry, Phase Sequence, Absence of Phase, High - Low Voltage, High - Low Frequency, PTC, Neutral break protection,
- Liquid level and light intensity monitoring functions
- Star, delta, and single-phase connection options,
- High precision and high mechanical durability.

Electronic Products

Industrial Relays - KRG Power Relays

We have different types of industrial relays, each with their own unique features and applications. When selecting an industrial relay for your project, it's crucial to choose one that matches your device's power requirements and has the right number of channels for controlling the desired devices. Reliable products, the right choice at an affordable price.

- All series are designed for universal use.
- Sockets can be used with different clips optionally.
- May include test buttons, diodes, and LED status indicators as needed.

Cable Ties

Natural : Made from U.L. approved polyamide 66.

Flammability rating : UL 94 V-2

Normal service temperature range : - 40° C to 85° C.

Black : Material and temperature as above, except in black color.

Specification : Made to comply with mil-spec drawing no. MS-3667 tensile strength meet or exceed MIL-S-23190 D standard.

B or S codes at the end of each cat. number indicate the color of the cable-tie.

Please contact for any requirements apart from the list.

B : White

S : Black

UV: Ultra Viole

Self-Adhesive Tie Mounts

Material : UL Approved Polyamide 66, UL 94V-2. (Backed with adhesive tape)
 Self-adhesive tie mounts are designed to support light weight wire bundles when properly applied on any clean, smooth, grease-free surface. For heavy support, mounting hole is provided for screws.

Installation : To apply, simply peel off backing paper and apply mount to surface. After that, cable ties can be inserted to secure wire bundles.

To apply with the cable ties :

YK 1 : Up to 4.7 mm. wide cable ties. B : White
 YK 2 : Up to 5 mm. wide cable ties. S : Black

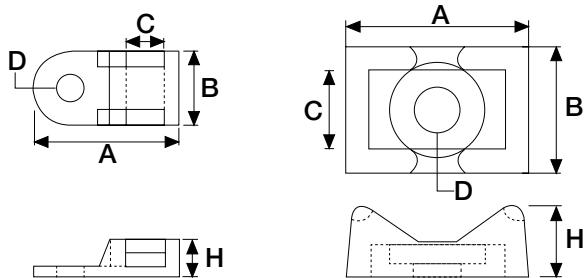

Type	Order No	Dimensions (mm)				Qty.
		A	B	C	H	
YK 1	541 210 B	21	21	4,4	5	500
YK 1	541 210 S	21	21	4,4	5	500
YK 2	541 280 B	28	28	6,5	5,8	500
YK 2	541 280 S	28	28	6,5	5,8	500

Saddle Type Tie Mounts

Material : UL Approved Polyamide 66, UL 94V-2.
 Saddle design provides maximum stability to wire bundles. To apply, simply fix mount with a screw and secure wire bundles with the cable ties.

To apply with the cable ties :
 VK 1 : Up to 5 mm. wide cable ties.

Insulated Terminals

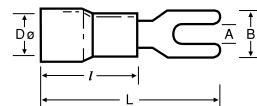

Insulated Terminals are made of E-Cu with tin - plating.
Insulation parts are made of PVC.

Insulated End Sleeves - Standard DIN Series

Single Cord Insulated End Sleeves

Material:

Insertion funnel is made of PA
Self-Extinguish
Metal cylinder is made of tin-plated copper
(EN 13600)
Heat resistant: -40~105°C
ROHS Compliant

Standard:

Dimensions and colours are compatible with
DIN 46228 According to UL 486 requirements

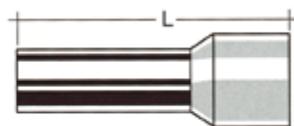

Color Standard: French

Package:

Transparent Box

Cable Cutting Tools

Order No	Product	Cable Cross-Section	Qty.
562 110	CUTTER 16	0,03 to 70 mm ²	1

- For burr-free cutting of standard wire cables
- Wide application range from 0,03 up to 70 mm²
- Blades with serrated edge
- Low hand force
- Soft-grips

Order No	Product	Cable Cross-Section		Qty.
		Solid	Stranded	
562 122	CUTTER 32	max. 25/15 mm AL/CU diameter	max. 32 mm diameter or 300 mm ²	1

- High tempered special steel
- Locking lever
- Step-wise and burr-free cutting
- Unlocking possibility in every position
- Hand tool model
- Ergonomically designed soft handles with non-slip grip material for comfortable working.

CE Sign

The letters CE stand for Comformite Europeene. CE sign confirms that a product meets the demands of all relevant guidelines and regulations of the European Union (EU), and declares a product is appropriate for human security and health. The products of Klemsan are subject to below directives:

1- Low Voltage Directive (LVD) - 73/23 EEC

This directive includes electrical devices which function in the range of 50-1000 V (alternative current) and 75-1500 V (direct current).

2- Equipment for use in potentially Explosive Atmospheres (ATEX)

- 94/9 EEC. ATEX is the name commonly given to the framework for controlling explosive atmospheres and the standards of equipment and protective systems used in them.

RoHS

The RoHS Directive stands for "Restriction of the use of certain Hazardous Substances in electrical and electronic equipment". This Directive bans the placing on the EU market of new electrical and electronic equipment containing more than agreed levels of lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyl (PBB) and polybrominated diphenyl ether (PBDE) flame retardants. The permitted ratios are below:

Cd - Cadmium - %0,01 ppm

Hg - Mercury - %0,1 ppm

Cr(VI) - Hexavalent chromium (coating) - %0,1 ppm

PBB - Polybrominated biphenyl (flame retardant) - %0,1 ppm

PBDE - Polybrominated diphenyl ether (flame retardant) - %0,1 ppm

Pb - Lead - %0,1 ppm

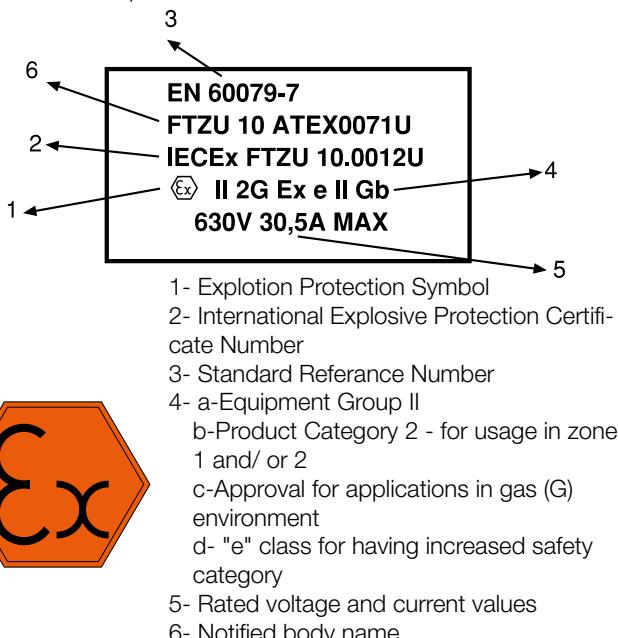

ppm: parts per million (in total weight)

Klemsan has developed some processes and components in accordance with RoHS Directives in 2006, and had its products tested in the approved laboratories, and achieved RoHS Conformity Approvals.

Pollution Severities

Pollution SeveATEX Directives regulating the "94/9/EC - use of equipment in potentially explosive atmospheres was put into force on December 1st 2003 by the European Union. By this directive, rated values for normal operating conditions have been revised for potentially explosive areas.

Below figure illustrates and verbalizes the meaning of the labels ATEX certificated products:

EQUIPMENT GROUP

1- Mines

2- Other industry branches

CLASSIFICATION OF POTENTIALLY EXPLOSIVE AREAS

ZONE 0: Places where the potential for explosion is high and duration is long under normal operating conditions

ZONE 1: Places where the potential for explosion is low and duration is short under normal operating conditions

ZONE 2: Places where there is no potential for explosion under normal operating conditions or low potential for explosion with short duration under defect, repair and maintenance situations.

"e" CLASS INCREASED SAFETY

This is an application where the precautions are taken although there is no arc occurring under normal operating conditions.

Security of the device is increased one step further. This application is used in environments with no danger of high temperature under normal operations e.g. in terminal block Boxes, cable connections. Such products do not need to be pressure resistant; it is sufficient to get their IP degree up to a level that assures water and humidity resistance.

Reach Directive

As the name implies, the 2006/1907/EC REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) directive, adopted by the European Union on 1 June 2007, obliges companies that produce, import or use chemical substances to register these substances and their uses and determine any related dangers and risks if required.

European Chemical Agency (ECHA) will publish the lists of SVHC (Substances of very high concern)

As of 01 December 2011, companies exporting goods into the EU must give a declaration to ECHA about their usage of SCVH as to whether the goods contain these materials in more than %0.1 SVHC as concentration/weight and more than 1 ton/year SVHC.

The European Union, by these directives, aims to record all the chemicals used in the industry and investigating these chemicals as to whether they have any hazardous effect on human health and environment, it can restrict or prohibit the usage of some chemicals in the industry.

Important Notice

- Klemsan Inc. reserves the rights for any changes in this catalogue.
- For the products that are not included in our catalogue please contact with our Trade Department.
- Figures and technical specs in this catalogue are only for general purpose.
- Our products are assembled to be in accordance with EC technical regulations and correspond to the national and international standards. All our products are fabricated in our ISO 9001 and ISO 14001 certified manufacturing plants.

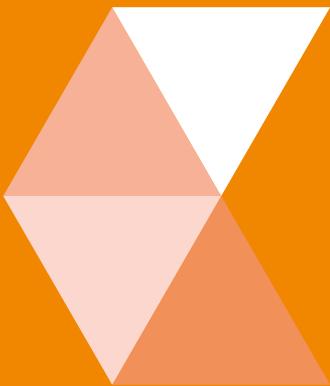

• For further information on the certificates: Tel : +90 (232) 877 08 00 • Fax: +90 (232) 877 08 06

• All terminal blocks within the scope of this product catalog are compatible with the Rules for the classification and construction of sea going ships, the Technical Regulation Concerning the safety of Sea Transport Items (TR-620)
