HOUSINGS  
p.23

### GENERAL CHARACTERISTICS

Multipole connectors for industrial purposes are used in electric and electronic machinery, robots, electric panels, control equipments and wherever connections are required for power, control and signal circuits. The connectors are designed for heavy duty industrial applications and are suitable for use with alternate or direct current. They facilitate production, installation and maintenance of sectional electric parts in complex machinery in conformity with European and US Standards.

### STANDARDS

EN 61984 : Connectors safety requirements and tests

VDE 0627 : Connectors

UL 1977 : Component connectors for use in data, signal, control and power applications

ME connectors are in conformity with both European / International and American systems. This permits using them in wide range of applications worldwide.

Products comply with Low Voltage Directive 2006 / 95 / EC.

### INSERTS

The inserts are made of self extinguishing thermoplastic resin according to UL 94 -V0, normally used in ambient temperature range of -40°C ... +125°C. The inserts are available in screw, crimp and spring type. Contacts are made of silver plated brass. All inserts are numbered by laser printing after injection moulding. They are:

- Suitable for use with alternate or direct current
- Leading protective ground
- Polarized for correct coupling
- Interchangeable male and female inserts in hoods and housings
- Captive screws
- Universal and can be used with all types of hoods and housings

### HOOD & HOUSING

A large variety of Hood and Housings are available for specific industrial applications. The principal parts are made in die-cast aluminium alloy coated with electro-static powder paint. They are resistant to impact and strong mechanical stress.

Coupling stability and protection against accidental openings are assured by a single or double locking system comprised of monobloc metal latch made of galvanized steel.

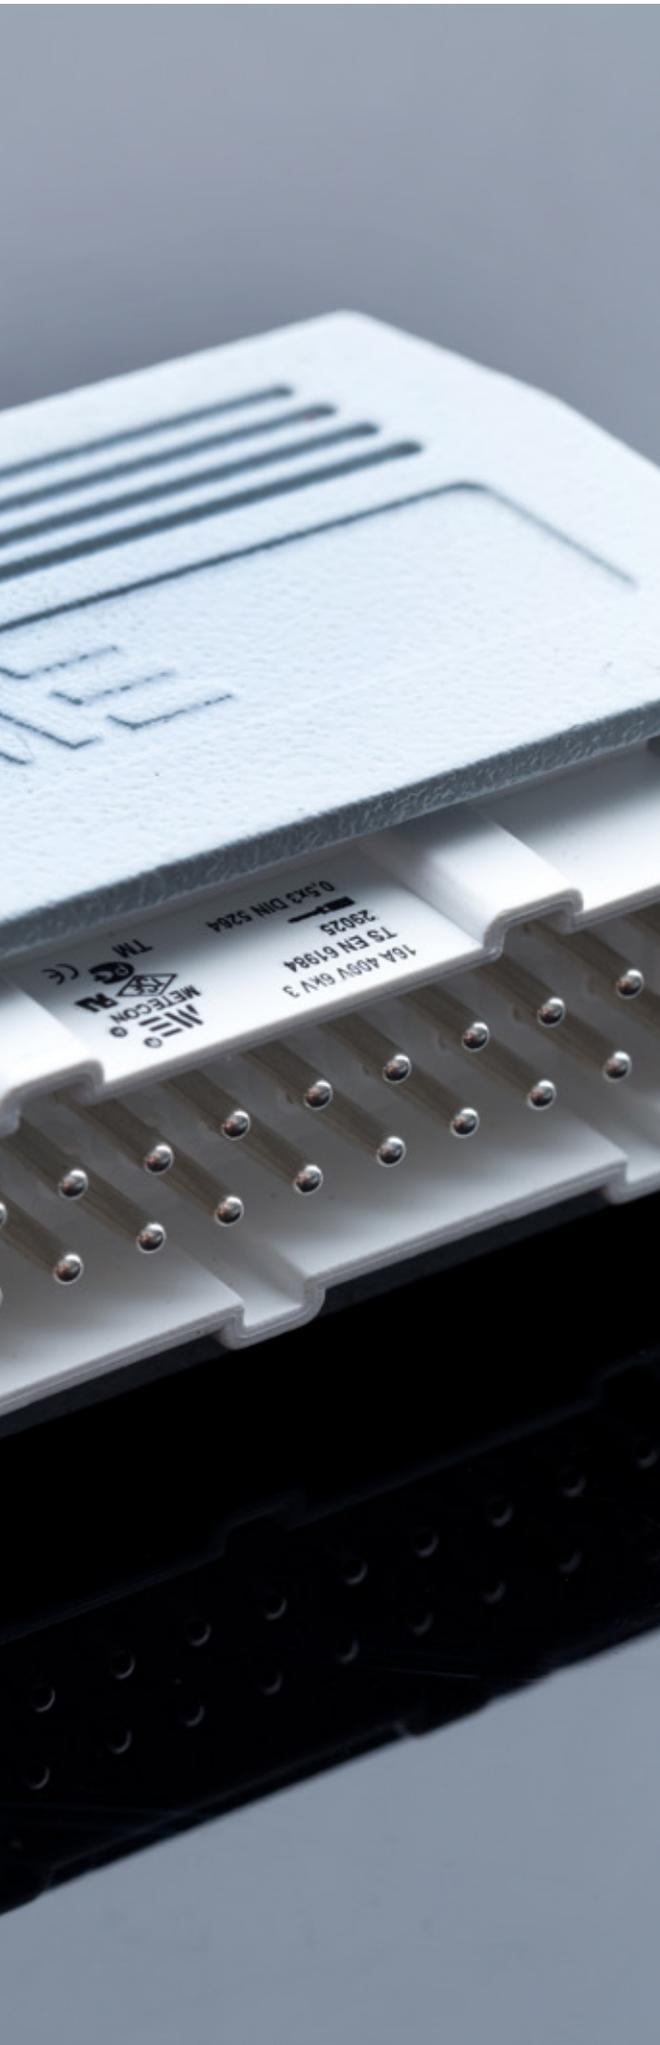

Sealing is assured by special gaskets that protect the inserts inside the hood and housings against dust, water and other aggressive agents.

- Innovative design
- Degree of protection IP65 when connected
- Electrical connection with protective ground
- High mechanical strength and vibration resistance ensured by locking levers

### DESIGN AND TESTING

The connectors have been designed and tested to meet the international electrical and environmental standards.

## TECHNICAL FEATURES

- 1) Wide range of accessories
- 2) Cable inlet in various PG, METRIC and NPT thread
- 3) Hoods and housings die casted from aluminium alloy and self extinguishing thermoplastic inserts
- 4) Aluminium hoods and housings are powder coated with high resistance to mechanical stress and external agents
- 5) Inserts are made of self-extinguishing thermoplastic material reinforced with glass fiber within an operation temperature range of -40 °C ... +125 °C
- 6) Inserts are designed by assymmetric guide rails for preventing incorrect coupling
- 7) Special seal gaskets provide an IP65 degree of protection for coupled connectors
- 8) Captive screws with anti-loosening flexible washers
- 9) Contact positions are molded and laser printed on the inserts
- 10) Contacts are coated by silver with connection to the conductors made via captive screws
- 11) Earth terminal with wide contact surface
- 12) Nickel plated screws and wire protector are made of brass

## ELECTRICAL DATA

### Overvoltage Category:

Overvoltage category is dependent on the mains voltage and the location at which the equipment is installed. It describes the maximum overvoltage resistance of a device in the event of a power supply system fault (i.e.in the event of a lightning strike).

The overvoltage category effects the dimensioning of components in that it determines the clearance air gap.

Pursuant to the relative standards there are 4 overvoltage categories:

Category I: Equipment for connection to circuits in which measurements are taken to limit transient overvoltage to an appropriately low level (i.e.protected electrical circuits).

Category II: Energy consuming equipment to be supplied from the fixed installation (i.e. appliances and household equipment with similar loads)

Category III: Equipment in fixed installations and for cases where the reliability and the availability of the equipment is subject to special requirements (i.e. equipment for industrial use with permanent connection to the fixed installation)

Category IV: Equipment for use at the origin of the installation (i.e. electricity meters). Overvoltage category III include equipment and components for industrial use like METECON MULTIPOLE CONNECTORS.

### Pollution Degree:

The dimensions of operating equipment is dependent on environmental conditions. Any pollution or contamination may increase conductivity together with moisture, may affect isolation.

The pollution degree influences the design of the components in terms of creepage distance.

Pollution degree 1: In air conditioned or clean, dry rooms such as computer and measuring instrument rooms. No pollution or only dry, non-conductive pollution occurs.

Pollution degree 2: In residential areas and other business premises, precision engineering workshop, laboratories, testing bays, rooms for medical purposes. Only non-conductive pollution occurs except that occasionally a temporary conductivity caused by condensation is to be accepted.

Pollution degree 3: In industrial, commercial and agricultural premises, unheated storage premises, workshops or boiler rooms, machinery and for industrial automation. Conductive pollution occurs or dry non-conductive pollution occurs which becomes conductive due to condensation which is to be expected.

Pollution degree 4: In outdoor or exterior areas such as equipment mounted on the roofs of locomotives or tramcars, elevators and machinery operating outdoor for building. The pollution generates persistent conductivity caused by conductive dust or by rain or snow. METECON multipole connectors are designed as standard for pollution degree 3 and 2.

**Hood**

Aluminium hoods:

- Narrow and high construction hoods
- Three different locking mechanisms
- IP65
- Cable entry options:
  - └ PG
  - └ Metric
  - └ NPT

**Male Insert and Contacts**

- Silver plated
- Screw, spring and crimp connection
- Numbering with laser marking for right connection

**Female Insert and Contacts**

- Silver plated
- Screw, spring and crimp connection
- Numbering with laser marking for right connection

**Bulkhead Mounting Housing**

Aluminium hoods:

- Three different locking mechanisms
- NBR Gasket
- IP65

**MECEE**<sup>®</sup>  
industrial plugs and sockets

# ***INDUSTRIAL IEC PLUGS & SOCKETS***

## CEE and IEC

The term CEE generally refers to Industrial Plugs and Sockets that comply with International Standard IEC 60309. CEE is the abbreviation of International Commission on rules for the approval of Electrical Equipment.

## CONFORMITY TO STANDARDS

CEE plugs and sockets are internationally normalized by IEC 60309-1 and IEC 60309-2 equivalent to the European Norms EN 60309 part 1 and EN 60309 part 2.

IEC is the International Electrotechnical Commission - which is the world organization for international standardization of electrical equipment:

## CENELEC

European Committee for Electrotechnical Normalization - members are the national electrotechnical committees from Austria, Belgium, Bulgaria, Czech Republic, Croatia, Cyprus, Denmark, Germany, Estonia, Finland, France, Greece, Hungary, Ireland, Iceland, Italy, Latvia, Lithuania, Luxemburg, Malta, North Macedonia, Netherlands, Norway, Poland, Portugal, Romania, Slovenia, Slovakia, Sweden, Switzerland, Spain, Türkiye and the United Kingdom.

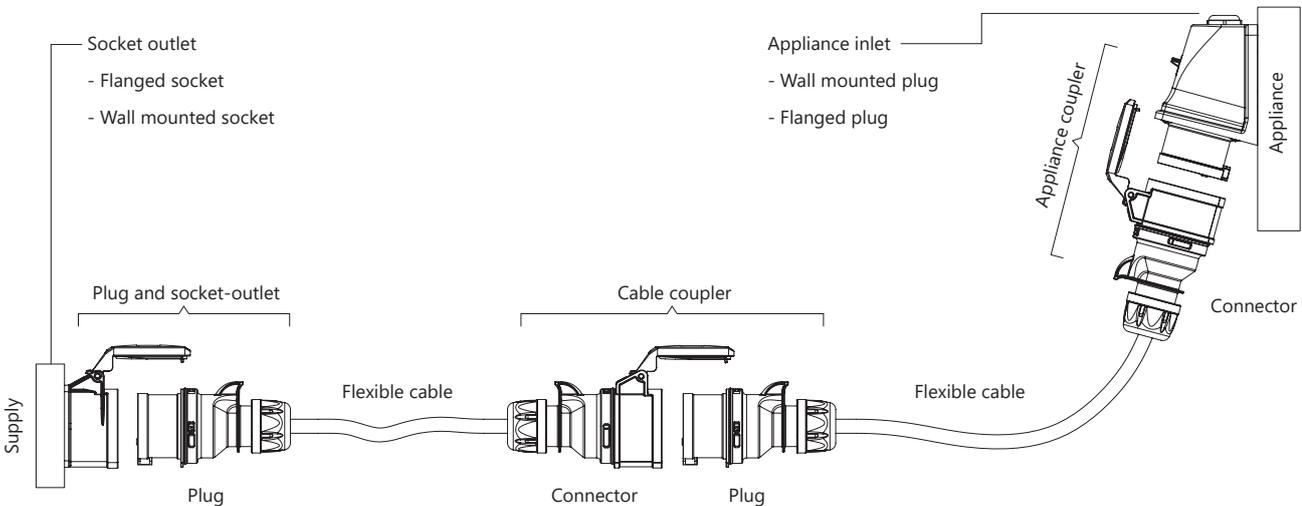

## SYSTEM

The standard CEE plugs and sockets according to EN 60309 respectively IEC 60309 are designed in their main dimensions in a way that plugs and sockets with the same rated currents, nominal working voltage ranges, the same number of poles and frequency of different producers are compatible.

In order to prevent the insertion of plugs and sockets of different voltages and frequencies, 12 positions of the earthing contact are assigned to the polarizing slot of the skirt of a socket.

The number with the following letter h indicates the position of the earth contact tube, comparing the frontside of the socket or connector with the face of a clock. The keyway is situated at 6 o'clock (see page 11).

## TERMINOLOGY

## PILOT CONTACT

The pilot contact for levels of current from 63A to 125A is an auxiliary contact – with delayed close when inserted and leading open when pulled – and is used as an electrical interlock. An interlock prevents inserting and pulling under load. CEE connectors and socket-outlets with pilot contact have longer phase contacts and do not guarantee safety from finger-touch. This must be done by an interlock.

### Technical Data

Connection Type:	Screw Terminals
Wire flexible (mm <sup>2</sup> )	1 - 2,5
Solid (mm <sup>2</sup> )	1 - 4
Contact screws (Ncm)	100 Ncm
Rated current	2 A

As METE CEE plugs and sockets have sufficient switching capacity the CEE couplings and socket-outlets are supplied as standard without a pilot contact and shorter phase contact with protection from finger-touch.

## PCS (PILOT CONTACT SYSTEM):

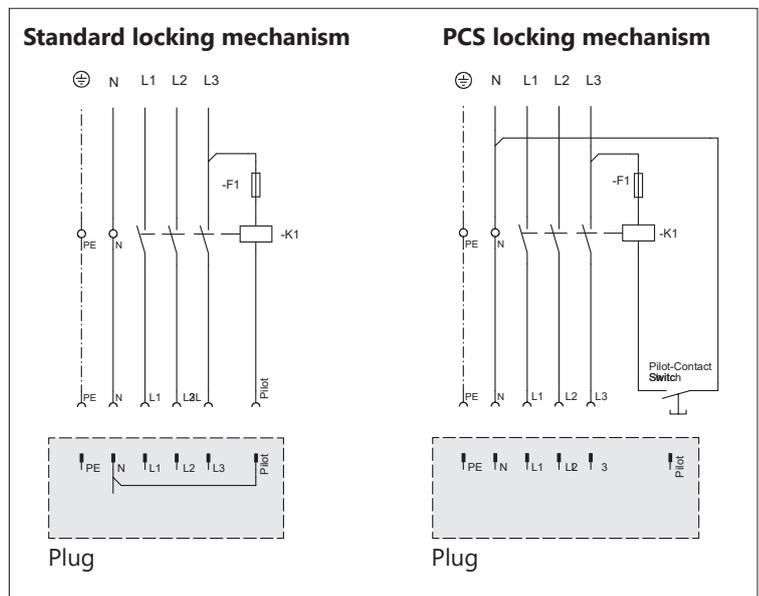

The PCS is a built-in auxiliary contact, used only for 63A and 125A connectors and socket-outlets, for protective electrical interlocking or for additional control purposes, with isolated connection in the socket-outlet. CEE connectors and sockets have longer phase contacts and guarantee no finger protection; this must be fulfilled by a locking.

The PCS provides the following advantages:

- No special cable required for the plug
- Isolated inserting and pulling

Technical Data:

- Contacts: Silver-coated
- Wires: 2x YF 1.5qmm 450mm
- Rated current: 2A

## TERMINAL CROSS-SECTION, DISMANTLING AND STRIPPING LENGTH

Recommended datas for METE products

Rated Current	Terminal cross-section		Dismantling length (mm)	Stripping length (mm)
	wire flexible (mm <sup>2</sup> )	wire solid (single or stranded) (mm <sup>2</sup> )		
16A - CEE	1 - 2,5	1 - 4	50	10 - 12
32A - CEE	2,5 - 6	2,5 - 4	50	12 - 14
63A - CEE	6 - 16	6 - 25	100	15 - 18
125A - CEE	16 - 50	16 - 70	100	24 - 27

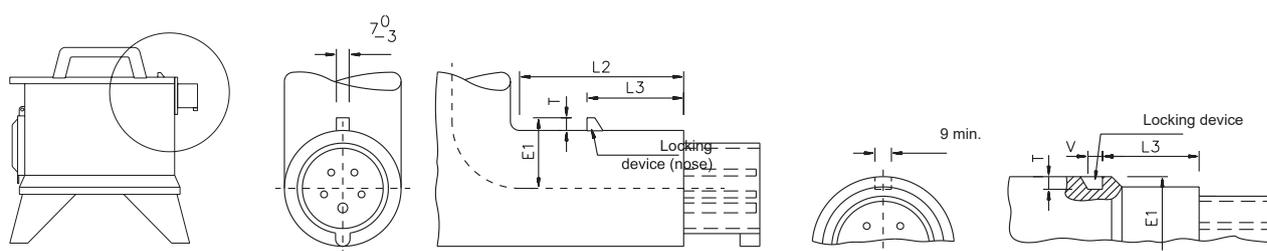

## LOCKING DEVICE

A locking device prevents unintended withdrawal by locking the hinged lid in a lug/cavity or a bayonet system with a bayonet ring. According to IEC/EN 60309 the following locking devices have to be provided:

rated current	protection degree	sockets and connectors	plugs and appliance plugs
16A and 32A	IP44	hinged lid	lug/cavity
16A and 32A	IP67	bayonet system	lug/cavity and bayonet ring
63A and 125A	IP67	bayonet system	bayonet ring

Extract from the standard EN60309 for plugs and flanged plugs

Positioning table (in mm):

		E1	L2	L3 (IP44)	L3 (IP67)	T	V
16	3	29-31	≥75	40-41	37-38	≥4	≥8
16	4	33-35	≥80	46-47	43-44	≥5	≥8
16	5	37-39	≥90	52-53	49-50	≥7	≥8
32	3	39-41	≥90	53-54	50-51	≥7	≥8
32	4	39-41	≥90	53-54	50-51	≥7	≥8
32	5	44-46	≥105	58,5-60	55,5-57	≥8	≥9

## CONTACTS

The contacts are made of a copper-zinc alloy. The most important features are:

- High electric conducting capacity 15 MS/m / (m/Ω mm<sup>2</sup>);
- High resistance to extension up to 500 N/mm<sup>2</sup> (MPa);
- High corrosion resistance in areas of: industrial atmosphere, agriculture, . . .
- With nickel-plated contacts increased corrosion resistance in areas of: seawater, steam, sulphur hydrides, agriculture, dairies.
- Conform to RoHS-directiv 2011/65/EU
- METE sockets 63A and 125A have a CuBe lamellar spring for a well contacting and anti-corrosion contacts.

## TEMPERATURE

Ambient temperature: IEC/EN 60309 applies to CEE plugs and sockets which are used at an ambient temperature that does not normally exceed the range from -25°C to +40°C.

Temperature resistance: METE CEE plugs and sockets themselves have a temperature resistance of -25°C to +80°C (100°C for 1 hour)

## IK-CODE:

The IK code is a coding system according to IEC/EN 50102 respectively IEC/EN 62262, which defines the degree of protection provided by an enclosure against damaging mechanical loads.

Each characteristic numerical group of the IK Code represents a load energy value as per the table:

IK-Code	IK01	IK02	IK03	IK04	IK05	IK06	IK07	IK08	IK09	IK10
Load energy in joule	0,14	0,2	0,35	0,5	0,7	1	2	5	10	20

## PLASTIC MATERIAL

Our plugs and sockets are produced from POLYAMIDE 6 as well as PC/ABS. The main characteristics of these materials are:

- Excellent impact resistance combined with high rigidity and solidity,
- High thermal stability (self-extinguishing),
- Very good insulating qualities,
- High disruptive strength,
- High abrasion resistance,
- High weathering resistance,
- Very good chemical resistance to various chemicals,
- Free from cadmium and halogen (fluorine, chlorine, bromine, jodine, astatine)
- Conform to ROHS Directive 2011/65/EU

### Overview chemical resistance:

Chemicals	Concentration	Resistance		Chemicals	Concentration	Resistance	
		PA6	PC/ABS			PA6	PC/ABS
acetone		+	-	potassium hydroxide	50%	o	-
aldehyde		o	-	ketone		+	-
alcohols		-	+	fuels		+	o
formic acid	4-5%	+	o	methane		+	x
amine		+	-	petroleums		+	+
ammonia	5%	+	o/-	sodium chloride		+	+
ammonium chloride	35%	+	-	sodium hydroxide	10%	+	x
inorganic salts		+	o	sodium hydroxide	2-8%	+	-
benzine		+	+	nitrobenzene		+	-
benzol		+	o	oils		+	+
chlorine		o	o	phosphoric acid	10%	-	o
acetic acid	5%	o	+	propanol		+	o

ethyl aether		+	o	hydrochloric acid	2%	-	o
fats		+	+	sulfuric acid	50%	-	+
hydrofluoric acid		-	o	propellants (propane - butane mixture)		x	-
formaldehyde	5%	+	-	water		+	+
formalin	3-4%	+	-	hydrogen peroxide	30%	o	+
glycol		o	o	citric acid	20%	o	+
glycerin		+	o				

- + resistant
- o conditionally resistant
- not resistant
- x not specified

The information about the resistance is valid with ambient temperature and can lead in coincidence of different medias to different resistances.

These indications do not exempt from own tests to determine the actual suitability of the products for the intended use.

## IP (INGRESS PROTECTION)-RATINGS

CEE-plugs and sockets with rated currents 16A, 32A and 63A must meet the system of protection IP44 or IP67; 125A protection degree IP66/67 according to EN 60529.

The degree of protection is tested on sockets and connectors, with and without inserted plug or appliance plug and on plugs and appliance plugs, when fully inserted into the socket or connector.

1st digit	Protection against ingress of solid objects	2nd digit	Protection against penetration of water
2	Ø 12,5 mm	0	non protection
3	Ø 2,5 mm	3	spraying water at an angle up to 60° from the vertical
4	Ø 1 mm	4	splashing water from any direction
5	dustproof	5	water jets from any direction
6	dust-tight	6	strong water jets from any direction
		7	temporary immersion in water under defined pressure and time
		8	continuous submersion in water under defined pressure and time

Example: IP44 = 1st digit = 4 . protection against solid objects larger than 1mm Ø  
 2nd digit = . 4 protection against splashing water from any direction

If the system allows plugs of a certain IP rating to be introduced into socket-outlets having another IP rating, attention should be drawn to the fact that the resulting degree of protection of the combination plug/socket-outlet is the lower of the two.

### Explanation for double marking IP66/67 and IP66/68:

According to IEC 60529, an accessory designated with second characteristic numeral 7 or 8 is only suitable for immersion. For protection against exposure to water jets, additional testing is required according to second characteristic numeral 5 or 6 and then the product should be marked accordingly.

# 16A/32A

LET'S TAKE **QUICK** - IT'S EASY, QUICK AND SAFE

## ■ ■ ■ QUICK CONNECTION

### Contact screws

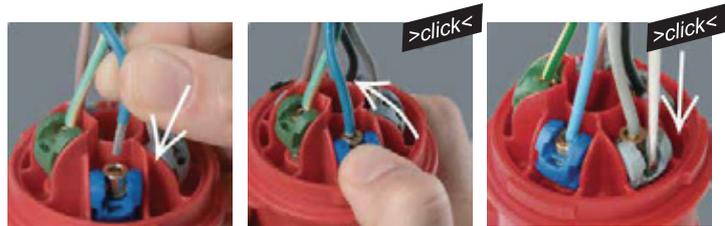

- Accessible from one direction
- Captive and open
- With multi-slot

### No screws needed to assemble the plug

- Multi-ramp quick-lock system
- Easy fitting by twist-lock action ---> saves your time

### Dismantling

- Simply unlock and twist to open

1) Insert wire

2) Close terminal

3) Reopen terminal

### Screwless connection technology

- Time saving
- Screwless terminal
- Open contact terminals, ready for assembly
- Fast cable installation
- Simple closing and opening just by thumb pressure

### For all standard cable diameters

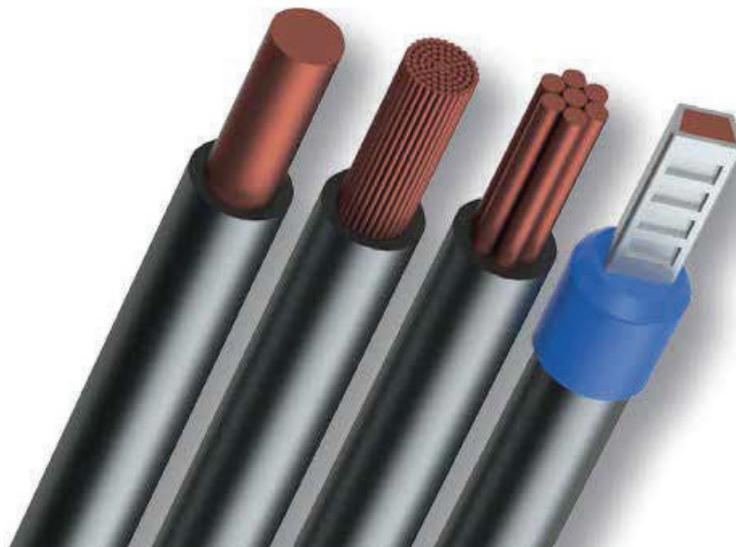

- 16A: up to 2,5 mm<sup>2</sup> flexible, up to 4 mm<sup>2</sup> solid
- 32A: up to 6 mm<sup>2</sup> flexible, up to 10 mm<sup>2</sup> solid

### Conductors (stripped)

- Flexible with or without end sleeve
- or solid wires

## ■ ■ ■ ADVANTAGES OF THE NEW CABLE LOCK GLAND

- Saves time
- Simply insertion of the cable in less time
- Strain relief and sealing of the cable by tightening the cable-lock gland
- Usable for all known cable types
- Self-adjusting gasket for different cable diameters
- Maximum cable security

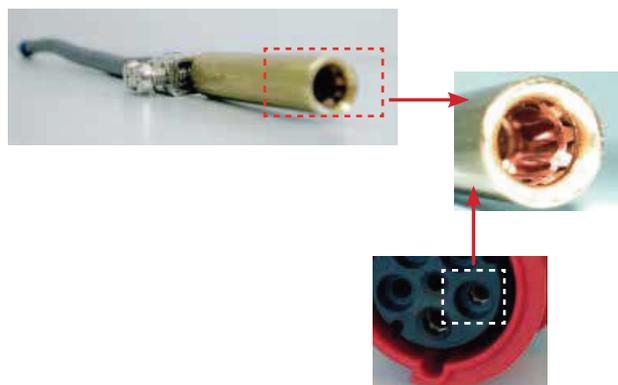

# 63A/125A

**SAFETY HEAVY DUTY TIME SAVING**

## ■ ■ ■ SAFETY

### Lamellar spring

- Low insertion and extraction forces
- Minimum contact resistance
- Self-cleaning
- Optimum contact - at least 10 contact points

### TWIST-cable gland

- Secures the cable firmly in position
- Protects from water and dust
- Safety screw locks the screw cap in position

## ■ ■ ■ HEAVY DUTY

**For extreme environments**  
**Exceptional high impact resistance**  
**Extreme heat resistant contact carriers**  
**Anti-corrosion contacts**

- offer protection in aggressive atmospheres, e.g. in chemical plants

## ■ ■ ■ TIME SAVING

**TWIST-cable gland**  
**Optimum grip**  
**Wide connection space**

- fast cable installation

**Open contact terminals,**  
**ready for assembly**

406555V	Flanged Socket (Straight)	IP67	10
406435V	Connector	IP67	10

### 3x32A (3P) - 24 V 50-60 Hz Screw Connection

Product Code	Description	IP Degree	Box Qty.
406137V	Plug	IP44	10
406556V	Flanged Socket (Straight)	IP44	10
406436V	Connector	IP44	10
406138V	Plug	IP67	10
406557V	Flanged Socket (Straight)	IP67	10
406437V	Connector	IP67	10

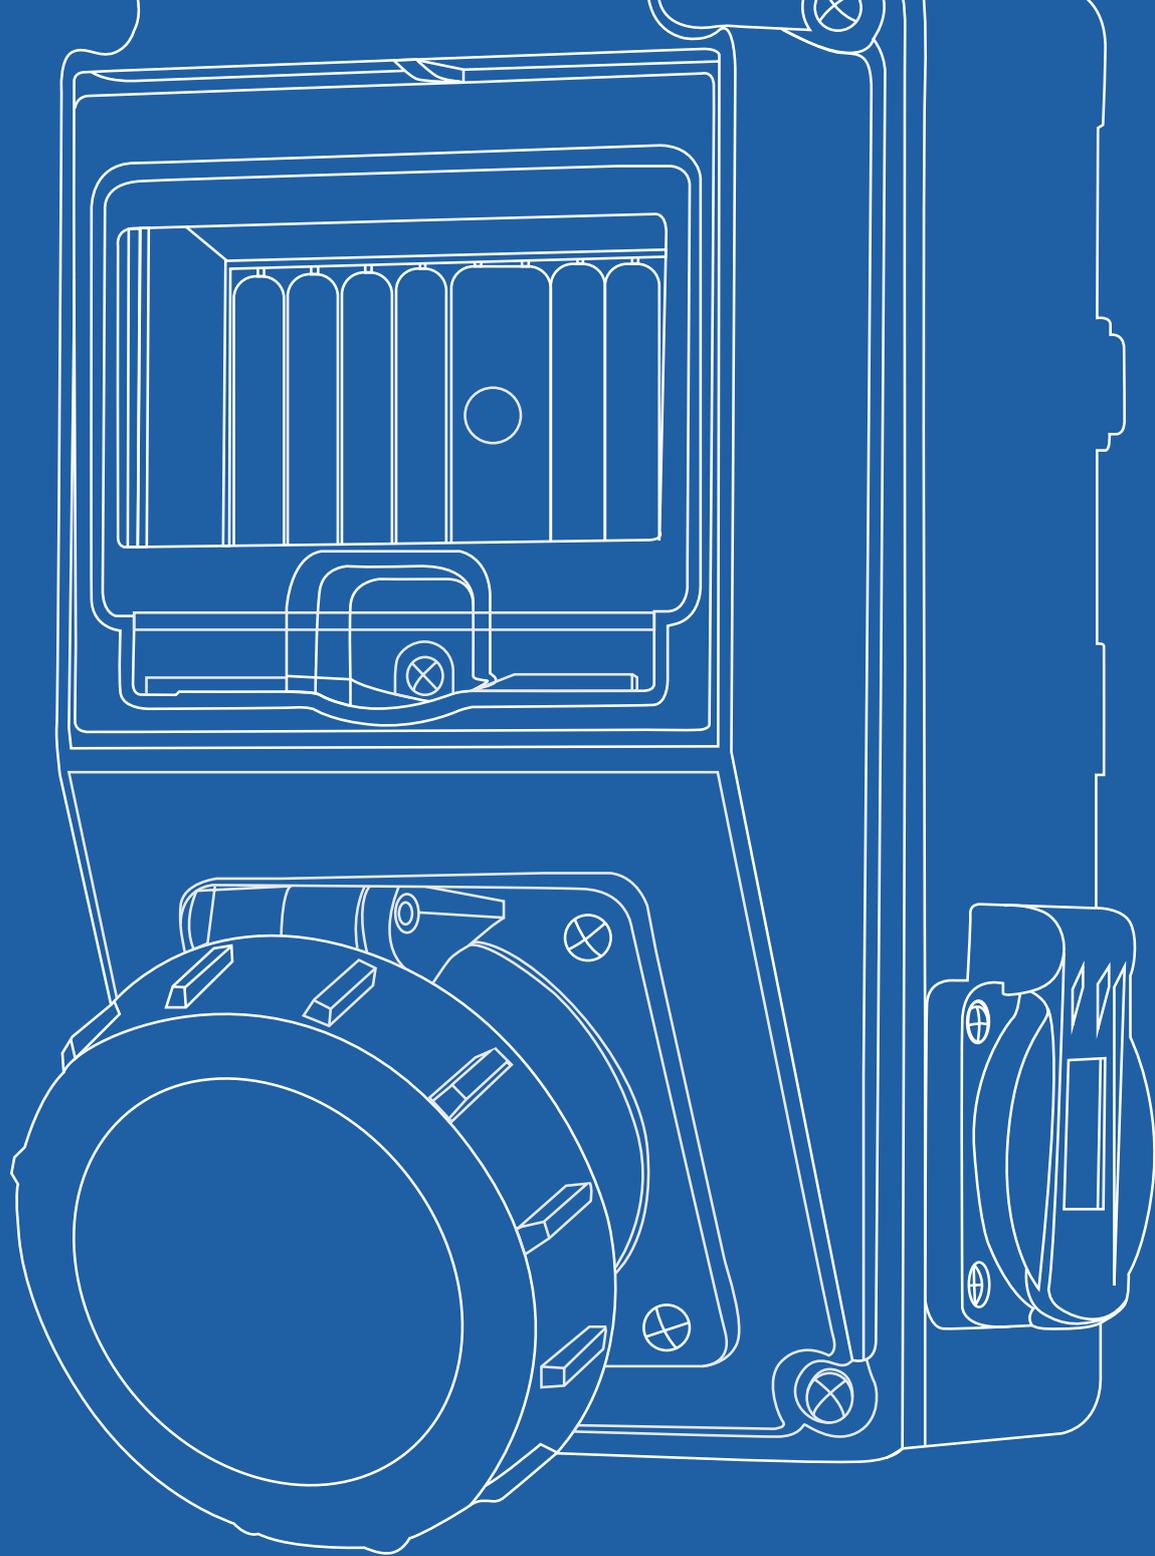

4x32A (3P+E) - 440 V 3h 50-60 Hz Container Plugs & Sockets

Screw Connection

Product Code	Description	IP Degree	Box Qty.
406129V	Plug	IP67	10
406439V	Connector	IP67	10
406550V	Flanged Socket (Straight)	IP67	10
406578V	Flanged Socket (Angled)	IP67	10
406631V	Wall Mounted Socket ( Straight)	IP67	5
407752423V	Interlock Wall Socket	IP67	1

# INSPIRED BY NATURE

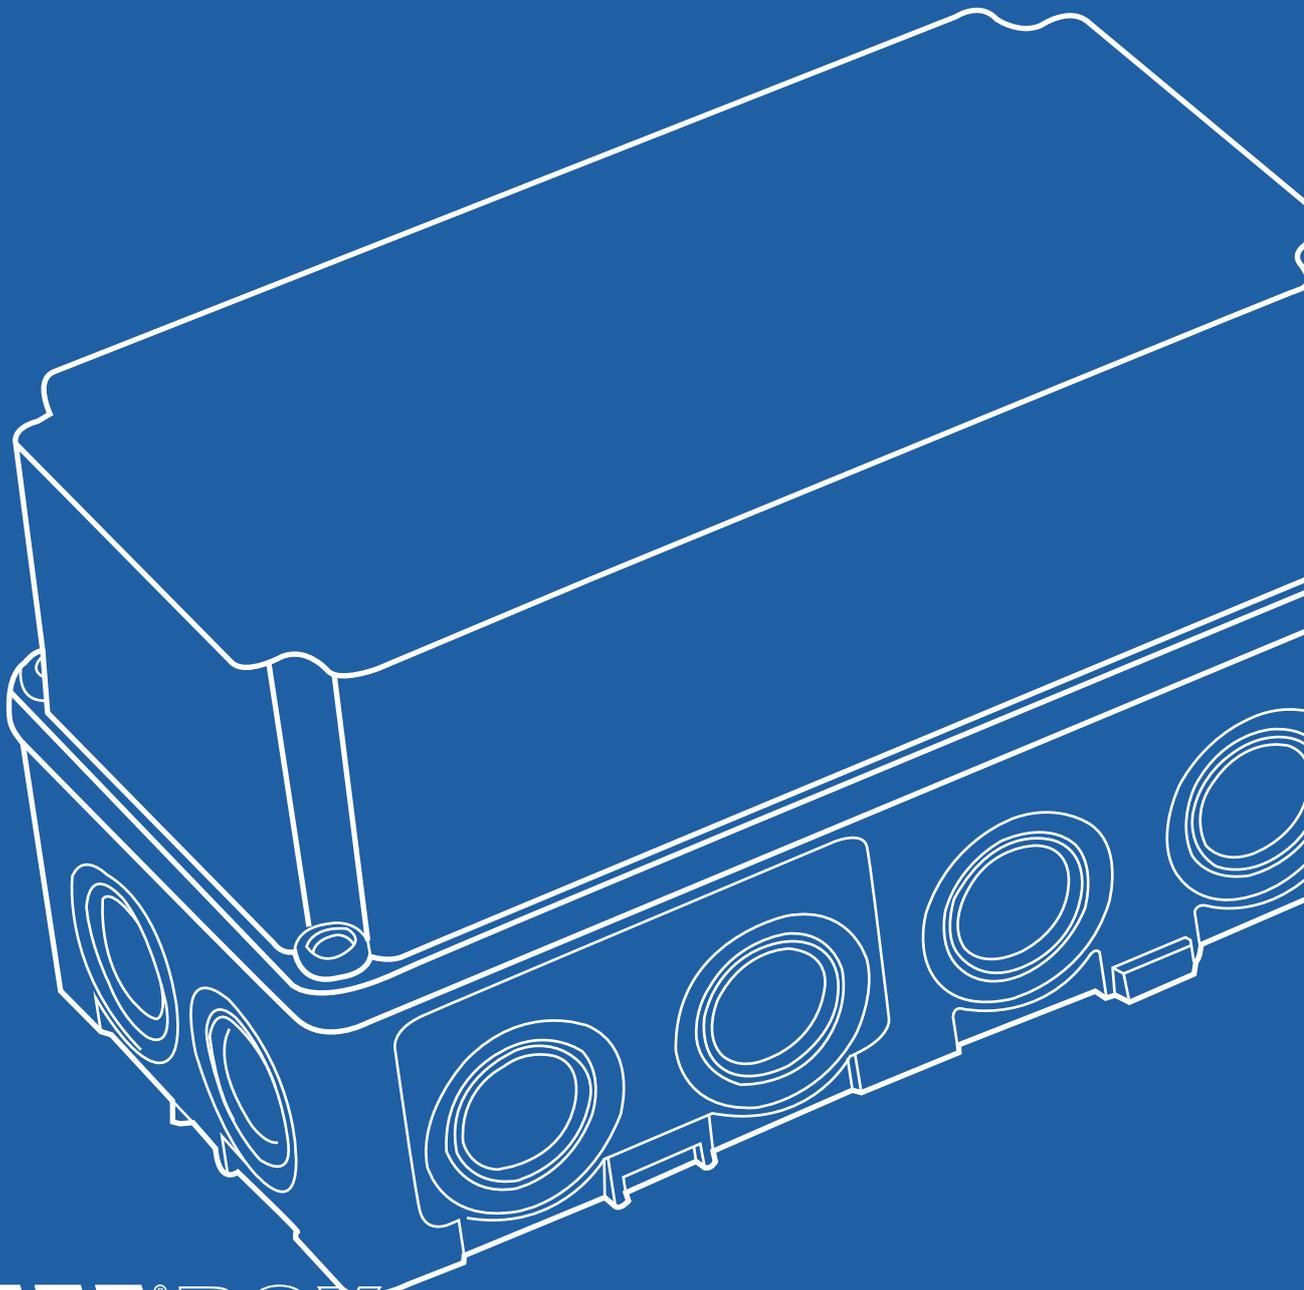

The electric power in a single lightning flash is about 200 thousand amperes. This electrical power can cause the lightning channel heat up to about 28,000 degrees Celsius.

**METE** COMBINATION

thermoplastic/aluminium enclosures

# ***THERMOPLASTIC & ALUMINUM ENCLOSURES***

Automated gasket filling technology (FIPFG)\*

Stainless Steel Screws

Liquid gaskets for IP67/68

Inner earthing connection

Our aluminium enclosures and push button boxes provide IP67 / IP68 protection.

Carried out with CNC controlled sealing machine polyurethane material poured into the product and with chemical reaction it is swollen in the channel without forming a joint assuring watertightness.

In this case, the protection degree is reached every time under the same quality conditions provided.

*All our enclosures can be drilled or cut according to your drawings.*

## ALUMINIUM ENCLOSURES

Protection Degree	IP67 / IP68
Impact Resistance	IK 09
Operation Temperature	-25 °C / +60 °C
Colour	Grey RAL 7040
Gasket	PU
Screws	Stainless Steel
Earthing	Both on Cover & Base

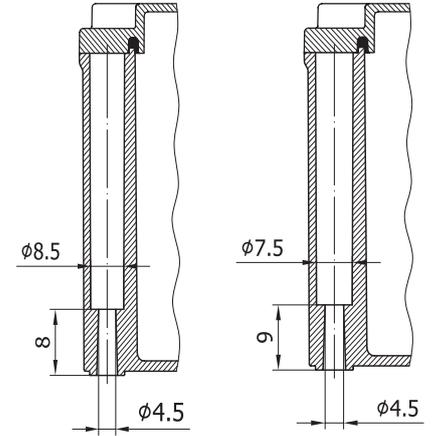

\*Formed in Place Foam Gasketing

## Enclosure Surface Mounting Screw Types

Type A

Type B

Type C

Type D

## EX-PROOF ALUMINIUM ENCLOSURES

Product Code	Dimension (mm)	Surface Mounting Screw Type	IP Degree
AExe-402556	ATEX Aluminium Enclosure 100x100x90	Type A	IP67
AExe-402511	ATEX Aluminium Enclosure 130x130x90	Type C	IP67
AExe-402516	ATEX Aluminium Enclosure 160x160x90	Type C	IP67

**ATEX**  
**IP67**

### Suitable for use in:

Zone 1-2 Gas environment  
Zone 21-22 Dusty environment

**AExe - 402516**  
**Zone 1-2/21-22**

**AExe - 402511**  
**Zone 1-2/21-22**

**AExe - 402556**  
**Zone 1-2/21-22**

### Application Areas:

- Shipyards and shipbuilding
- Treatment plants
- Metro and tunnels
- Energy plant facilities and cogeneration
- Waste and sewage
- Mining facilities

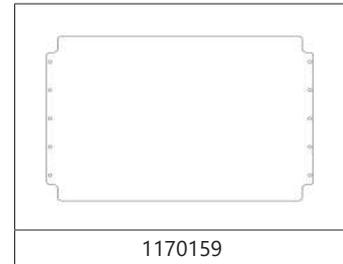

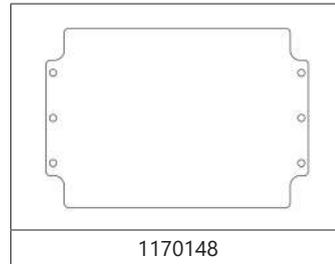

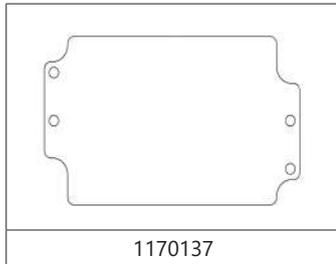

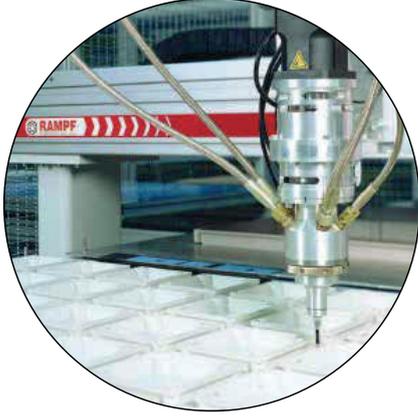

### Certification:

II 2G Ex eb IIC T6 Gb  
II 2D Ex tb IIIC T (85 °C) Db, IP 67

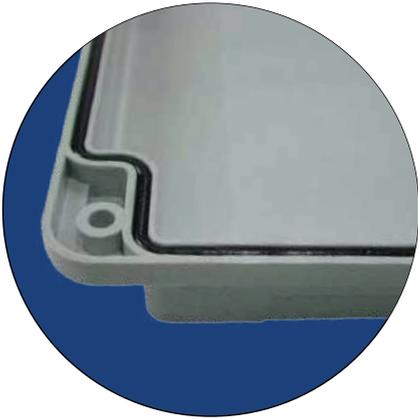

## ALUMINIUM ENCLOSURES - GALVANIZED MOUNTING PLATES

Product Code	Dimension (mm)	Thickness (mm)
1170137	80x130	1,5
1170138	80x170	1,5
1170139	80x230	1,5

1170151	170x190	1,5
1170152	170x190	1,5
1170153	180x180	1,5
1170155	180x280	1,5
1170156	190x250	1,5
1170157	190x350	2,0
1170158	250x250	2,0
1170159	310x400	2,0

• Durable fixing brackets increase IP Degree.

• Wide interior space provides easier assembly.

All of our enclosure range can reach up to IP67 protection degree thanks to the newest technique for gasketing which is known as Formed in Place Foam Gasketing. (FIPFG)

*All our enclosures can be customized according to your drawings.*

#### Cable Glands

- Protection degree IP55.
- Fits tight through cable entries.
- Flexible raw material enables to surround the cable perfectly.
- Long life raw material resistant to different weather conditions.

## THERMOPLASTIC ENCLOSURES

Material	ABS
Protection Degree	IP44 / IP66 / IP67
Impact Resistance	IK 06
Temperature Range	-25 °C / +60 °C
Flammability	Base: 650 °C
Color	Grey RAL 7035 (for more colours please contact us)
Transparent Covers	Polycarbonate

Thermoplastic Enclosures are available with knockout cable glands or smooth walls

Thermoplastic Enclosures and ABS Panels are available with or without UV Protection

## SMOOTH WALL OPTIONS

Sides with knock out cable gland  
(Standard Enclosures)

Sides without knock out cable gland

Options:

**01** : All sides are smooth e.g. 402025**01**05

**02** : Long sides are smooth e.g. 402025**02**05

**03** : Short sides are smooth e.g. 402025**03**05

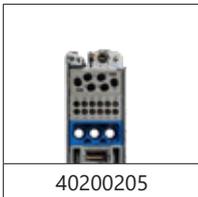

## COMBINATION BOXES

## Polyamide Cable Gland

Material : Polyamide 6  
 Certificate : GOST, CE  
 Working Temperature : -30°C to 80°C  
 Protection Class : IP 68,5 bar  
 Seal : Chloroprene  
 Colour : Gray, Black

**METE<sup>®</sup>SOLID**  
rubber plugs and sockets

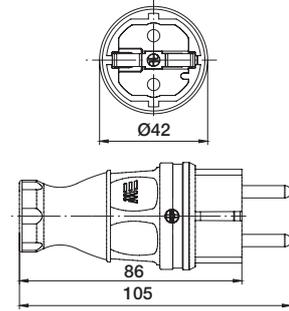

# ***RUBBER PLUGS & SOCKETS***

## General Features of Plugs

404001

- IP44 Protection Degree
- For Toughest Conditions
- Durable Rubber
- Double Earth System
- Easy To Use
- Solid Design
- Time Saving Easy Installation
- Wide Connection Range

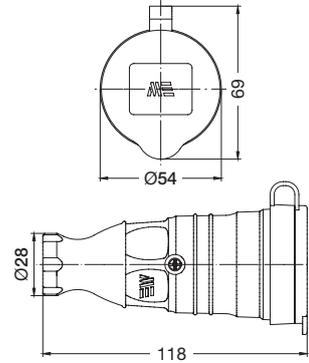

## Sockets

404010

- IP44 Protection Degree
- For Toughest Conditions
- Durable Rubber
- Double Earth System
- Easy To Use
- Solid Design
- Time Saving Easy Installation
- Wide Connection Range

### INSERTS

Material	PA6
Poles	2P+E
Electrical Data	16A 250V
Rated Current	16A
Voltage	250V
Impact Resistance	2 kV
Isolation Resistance	$\geq 5^{10} \Omega$
Flammability acc. to UL 94	V0
Mechanical Operating Life	$\geq 10.000$

### CONTACTS

Material	Brass
Surface	Nickel Plate
Contact Resistance	$\geq 1m \Omega$
Connection Type	Screw Connection

### HOUSINGS

Material	TPE
Protection Degree	IP44

# Plugs and Sockets IP66/68

## PLUG / CONNECTOR

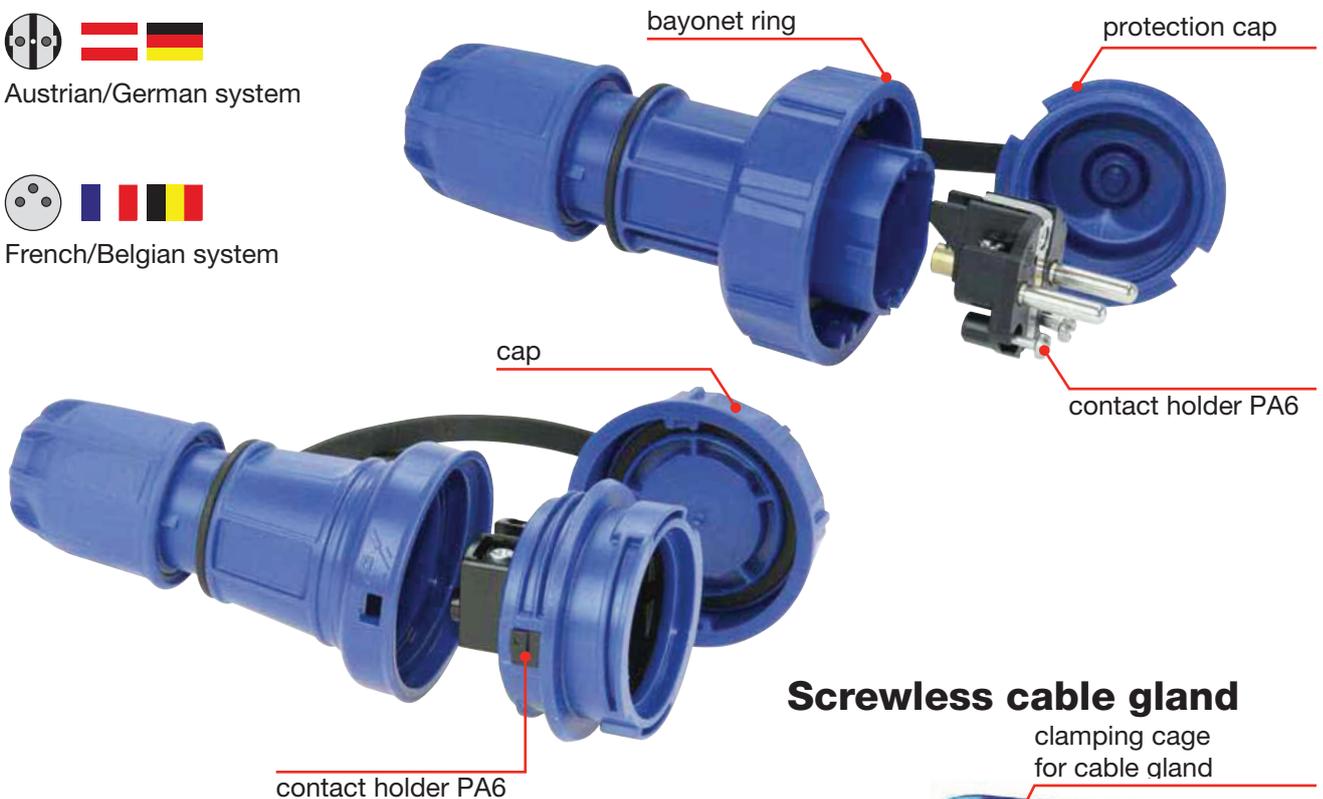

- IP66/68 waterproof up to 2 bar / 2 h •  for severe conditions • with/without shutter

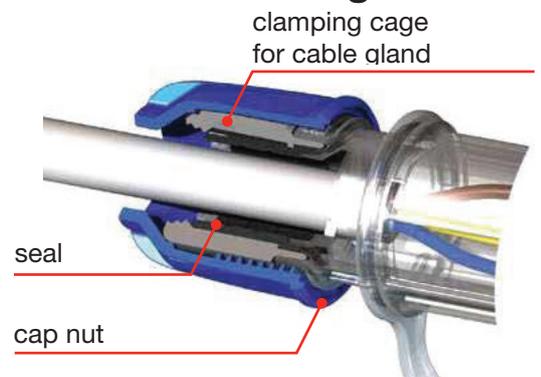

Austrian/German system

French/Belgian system

### Screwless cable gland

- Robust design
- Housing material pc/abs
- Protection cover with bayonet
- Contact supporting part of pa6, glow wire test 850°C
- Open contact screw head +/- (Typ H, Size 2)
- Nickel-plated screw terminals
- Cover and cap with elastic band
- Axels and mounting screws in stainless V2A quality
- Two earthing system (plug)
- Very large hinged lid opening angle (~160°)
- Color versions:
  - Blue (sim. Ral5005)

### Flanged Socket

## IP68 SERIES

### 1x16A (2P+E) - 250 V RUBBER PLUGS | French/Belgian&Austrian/German System

Product Code	Description	IP Degree	Color
40720051b	Plug	IP68	Blue

### 1x16A (2P+E) - 250 V CONNECTOR, SOCKET OUTLET | Austrian/German System
